Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer printouts, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Trade Information Unit,
International Trade Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9647) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(973-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

Newfoundland and Labrador	Zenith 0-7037
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192
Quebec	1-800-361-2831
Ontario	1-800-268-1151
Manitoba	1-800-282-8006
Saskatchewan	1(112)800-667-3524
Alberta	1-800-222-6400
British Columbia (South and Central)	112-800-663-1551
Yukon and Northern B.C. (area served by NorthwTel Inc.)	Zenith 0-8913
Northwest Territories (area served by NorthwTel Inc.)	Call collect 420-2011

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0T6.

Des données sous plusieurs formes...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Sous-section des renseignements sur le commerce,
Division du commerce international,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-9647) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(973-6586)	Vancouver	(666-3691)

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, aux utilisateurs qui habitent à l'extérieur des zones de communication locale des centres régionaux de consultation.

MERCHANDISE TRADE CONCEPTUAL FRAMEWORK

- A.0 Sources of Statistics:** Canada's international trade statistics are tabulated from copies of administrative documents, summarized reports and computer files collected by Revenue Canada, Customs. When goods are imported into or exported from Canada, a document or report must be filed with Customs giving such descriptions of the goods and details of the transaction as are required for the purposes of Customs administration. It follows that the method of compilation for international trade statistics is determined and limited to some extent by Customs regulations and procedures.

Statistics on trade in electricity and on exports of crude petroleum and natural gas cannot, because of timing, be obtained from Customs documents. Instead, trade in electricity is reported through the National Energy Board, while statistics on exports of crude petroleum and natural gas (by pipeline) are collected directly by the Industry Division of Statistics Canada.

Low value export and import shipments are subjected to sampling or derived by various estimating techniques; refer to Note B.10 and B.11 for further information.

- B.0 Concepts and Definitions Used in the Compilation of Canadian International Trade Statistics:**

- B.1 System of Trade:** Canadian statistics are tabulated according to the "general" system of trade. Imports include all goods which have crossed Canada's territorial boundary, whether they are entered through Customs for immediate consumption in Canada or stored in bonded Customs warehouses. Domestic exports include goods grown, extracted or manufactured in Canada (including goods of foreign origin which have been materially transformed in Canada). Re-exports are exports of goods of foreign origin which have not been materially transformed in Canada (including goods withdrawn for export from bonded Customs warehouses). Total exports are the sum of Domestic exports and Re-exports.

The trade statistics do not include exports to Canadian diplomatic or military posts abroad nor imports by foreign diplomatic or military posts in Canada because such posts are considered to be within the geographical boundary of the sponsor country. Purchases or sales of bunker supplies and stores for ships or aircraft engaged in international traffic and settlers' effects are excluded for practical reasons. Goods which cross the Canadian border for convenience of transportation only (in-transit) are not included in trade statistics.

- B.2 Coverage:** Merchandise trade includes only goods which add to or subtract from the stock of material resources in Canada as a result of their movement across the Canadian border. Consequently, goods intended to be returned to the exporting country after a short period of time are excluded from trade statistics. Examples of such transactions are works of art loaned for exhibition, vehicles or horses exported

COMMERCE DE MARCHANDISES CADRE CONCEPTUEL

- A.0 Sources des statistiques:** Les statistiques sur le commerce international du Canada sont totalisées à partir de documents administratifs, d'états récapitulatifs et de fichiers informatiques recueillis par Revenu Canada (Douanes). Lorsque des marchandises entrent au Canada ou en sortent, il faut remplir une déclaration précisant la nature de ces marchandises et les modalités de la transaction, conformément à la réglementation de l'administration douanière. Il s'ensuit que la méthode de collecte des statistiques sur le commerce international est déterminée et limitée jusqu'à un certain point par les règlements et les procédures des douanes.

Les statistiques sur le commerce de l'énergie électrique et l'exportation de pétrole brut et de gaz naturel ne peuvent, pour des raisons qui ont trait à la période de collecte des données, être établies à partir de documents de douane. Les données sur le commerce de l'énergie électrique sont plutôt obtenues par l'intermédiaire de l'Office national de l'énergie, tandis que les statistiques sur les exportations de pétrole brut et de gaz naturel (par pipeline) sont recueillies directement par la Division de l'industrie de Statistique Canada.

Les exportations et les importations de marchandises de faible valeur sont soumises à un échantillonnage ou calculées à l'aide de diverses méthodes d'estimation; voir les notes B.10 et B.11 pour plus de renseignements.

- B.0 Concepts et définitions utilisés dans la production de statistiques sur le commerce international du Canada:**

- B.1 Système commercial:** Les statistiques du Canada sont totalisées selon le système commercial "général". Les importations comprennent tous les biens qui ont franchi les frontières du Canada, que ces biens aient passé à la douane pour être consommés immédiatement au Canada ou aient été expédiés vers un entrepôt de douane. Les exportations nationales comprennent les biens cultivés, extraits ou fabriqués au Canada (y compris les biens d'origine étrangère qui ont été transformés au Canada). Les réexportations sont des exportations de biens d'origine étrangère qui n'ont pas été transformés au Canada (y compris les biens retirés des entrepôts de douane pour être exportés). Les exportations totales correspondent à la somme des exportations nationales et des réexportations.

Les statistiques sur le commerce ne couvrent pas les exportations vers des missions diplomatiques ou des bases militaires canadiennes à l'étranger ni les importations attribuables à des missions diplomatiques ou à des bases militaires étrangères au Canada puisqu'on considère ces établissements à l'intérieur des limites géographiques du pays qu'ils représentent. Les achats ou les ventes de ravitaillement pour les navires ou les avions affectés au transport international et les effets des immigrants sont exclus pour des raisons pratiques. Les biens auxquels on fait franchir la frontière canadienne uniquement pour en faciliter le transport sont également exclus des statistiques sur le commerce.

- B.2 Champ d'observation:** Le commerce de marchandises ne comprend que les biens dont le passage d'un côté à l'autre de la frontière canadienne augmente ou diminue le stock de ressources matérielles du Canada. Ainsi, les biens qui doivent être retournés dans le pays exportateur après un court laps de temps sont exclus des statistiques sur le commerce. Citons à titre d'exemple les œuvres d'art prêtées pour une exposition, les véhicules ou les chevaux exportés en

to compete in races, and films exported for processing and return. The value of goods exported or imported for purposes of repair only are excluded from trade statistics, although payments or receipts for the repairs are included. Financial assets such as circulating coins, stocks, and bonds are also excluded from trade statistics.

B.3 Valuation: *Exports* are recorded at the values declared on export documents, which usually reflect the actual selling price or, in the case of non-arm's-length transactions, the transfer price used for company accounting purposes. Most exports are valued at the place in Canada where they are laden aboard a carrier for export but some exports by water reflect values which include transportation charges to the port of export. Some overland shipments to the United States are recorded at a value which includes part or all of the transportation charges to the ultimate destination because such transportation charges cannot be identified and removed.

For Customs duty purposes, *imports* are recorded at values established according to the provisions of the Customs Act.

Prior to 1985, the Customs Act required the value for duty to reflect the highest of the selling price or the fair market value of the goods, i.e., the price at which similar goods could be sold on the domestic market of the exporting country. The selling price of the goods was recorded for statistical purposes. In practice, the fair market value and the selling price proved to be identical in most cases; therefore, few adjustments were required.

Effective January 1, 1985, these provisions were amended to reflect valuation methods based on the General Agreement on Tariffs and Trade (GATT) Valuation Code system which generally requires the value for duty of imported goods to be equivalent to the transaction value (i.e., the actual price paid for the goods).

Studies of the data for 1985 indicate that the transaction value is employed as the value for duty for approximately 95 per cent of import trade. For the remaining 5 per cent an alternative method of valuation was used in lieu of the transaction value. Analysis of these transactions indicated that the adjustments to the transaction value for Customs purposes were negligible under the new valuation code system; therefore, the value at which Canadian merchandise imports are recorded for statistical purposes is equivalent to the actual price paid for imported goods exclusive of charges such as freight and insurance.

Values appearing in most publications are presented in thousands of Canadian dollars. All totals and cumulative values are calculated from unrounded figures and rounded independently; therefore they will often differ from the sum of the rounded figures.

vue d'une course et les films exportés dans le but d'être développés, puis retournés. Les biens exportés ou importés uniquement à des fins de réparation ne sont pas couverts par les statistiques sur le commerce bien que les recettes ou les paiements y afférents le soient. Les éléments d'actif financier tels les pièces de monnaie en circulation, les actions et les obligations sont également exclus des statistiques sur le commerce.

B.3 Évaluation: *Les exportations* sont enregistrées selon la valeur déclarée dans les documents d'exportation; il s'agit habituellement du prix de vente réel ou, dans le cas des opérations entre entreprises affiliées, du prix de transfert adopté par les sociétés à des fins comptables. La plupart des exportations sont évaluées à l'endroit au Canada où elles sont confiées à un transporteur pour être expédiées à l'extérieur du pays; toutefois, le prix de certaines marchandises expédiées par bateau comprend les frais pour le transport vers le port d'exportation. Pour certaines marchandises expédiées par voie de terre aux États-Unis, la valeur indiquée comprend une partie ou la totalité des frais de transport jusqu'à la destination finale puisqu'il n'est pas possible d'isoler ni de retrancher ces frais.

Aux fins du prélèvement des droits de douanes *les importations* sont présentées selon les valeurs établies conformément aux dispositions de la Loi sur les douanes.

Avant 1985, la Loi sur les douanes stipulait que la valeur en douane représentait le prix de vente ou la juste valeur marchande, c'est-à-dire le prix auquel les marchandises importées se vendaient sur le marché intérieur du pays exportateur. En pratique la juste valeur marchande et le prix de vente dans la plupart des cas étaient identiques; par conséquent peu d'ajustements étaient nécessaires.

À la suite de modifications entrées en vigueur le 1^{er} janvier 1985, la Loi sur les douanes prévoit maintenant l'application de méthodes d'évaluation fondées sur le Code d'évaluation de l'Accord général sur les tarifs douaniers et le commerce (GATT); selon ce code, la valeur imposable des marchandises importées doit normalement correspondre à la valeur de la transaction (c'est-à-dire au prix réellement payé pour les marchandises).

Selon une analyse des données de 1985, la valeur de la transaction est reconnue comme la valeur imposable pour environ 95 pour-cent des importations. Le 5 pour-cent restant a été soumis à une méthode d'évaluation différente. Une analyse de ces transactions a montré que la différence entre la valeur de la transaction et la valeur en douane a été négligeable en vertu du nouveau code d'évaluation; par conséquent, on peut considérer que la valeur des importations canadiennes de marchandises utilisée dans les rapports statistiques correspond au prix réellement payé pour ces importations, abstraction faite de charges comme les frais de transport et l'assurance.

Les données figurant dans la plupart des publications sont exprimées en milliers de dollars canadiens. Comme tous les totaux et totaux cumulatifs sont obtenus à partir de chiffres non arrondis, puis arrondis indépendamment, ils différeront souvent du total des chiffres arrondis.

B.4 Timing: The closing of the statistical month is defined according to the last calendar day of the month, based, as closely as practicable, on the date of clearance from Customs. A small number of individual shipments may not be recorded in statistics until some time after their arrival or departure because of administrative procedures which permit late filing of documents.

Trade data for electricity, exports of both crude petroleum and natural gas, and imports of crude petroleum from the United States are collected too late for inclusion in statistics for the current month; therefore, trade values for the current month are imputed on the basis of previous months' data and revised with the true value in the following statistical month.

B.5 Treatment of Confidential Information: It is occasionally necessary to withhold publication of details where commodity or country information is known to involve disclosure. The suppression of commodity or country detail, however, does not affect aggregate totals, which include all transactions reported during the calendar month.

B.6 Commodity Classification: Export data is classified using the *Export Commodity Classification* and this serves as the basis for the commodity detail published in *Exports by Commodities* (Catalogue 65-004) and *Exports, Merchandise Trade* (Catalogue 65-202 annual). Import data is classified using the *Canadian International Trade Classification (CITC)* (reference manual Catalogue 65-502E) and, although this level of detail is not available in publication format, it can be provided on request. The CITC classification has been aggregated to the *Import Commodity Classification* which serves as the basis for the commodity detail published in *Imports by Commodities* (Catalogue 65-007) and *Imports, Merchandise Trade* (Catalogue 65-203 annual).

For purposes of presenting commodity detail in the *Summary of Canadian International Trade* (Catalogue 65-001), *Exports by Countries* (Catalogue 65-003) and *Imports by Countries* (Catalogue 65-006), both the export and import commodity classifications have been further aggregated to summary categories as described in the quarterly reports 65-003 and 65-006. The *Preliminary Statement of Canadian International Trade* (Catalogue 65-001P), for reasons of brevity, provides only major commodity groups including section totals.

B.7 Country Classification: The country classification employed by the International Trade Division of Statistics Canada is designed for purposes of economic geography and does not necessarily reflect the views or intentions of the Government of Canada on international issues of recognition, sovereignty or jurisdiction.

A classification of countries with a statement of territorial limits used for statistical purposes is shown in the January issues of the publications *Exports by Commodities* (Catalogue 65-004) and *Imports by Commodities* (Catalogue 65-007), and in the annual publications *Exports, Merchandise Trade* (Catalogue

B.4 Période: La fin du mois statistique correspond au dernier jour du mois civil pour lequel il est possible d'obtenir des données sur le dédouanement. Il se peut qu'un petit nombre d'expéditions ne soient pas enregistrées dès leur départ ou dès leur arrivée à cause des formalités administratives qui permettent une production tardive des documents.

Les données sur le commerce de l'énergie électrique, sur les exportations de pétrole brut et de gaz naturel et sur les importations de pétrole brut en provenance des États-Unis sont recueillies trop tard pour être incluses dans les statistiques du mois courant. Par conséquent, les valeurs marchandes applicables au mois courant sont imputées au moyen des données du mois précédent, puis rajustées au cours du mois statistique suivant en fonction des valeurs observées.

B.5 Renseignements confidentiels: Il est parfois nécessaire de supprimer le détail de données concernant certaines marchandises ou certains pays afin de protéger le caractère confidentiel de ces données. La suppression du détail des marchandises ou des pays ne modifie toutefois pas les totaux agrégés, qui comprennent toutes les opérations rapportées au cours du mois civil.

B.6 Classification des marchandises: Les données sur les exportations sont groupées selon la *Classification des marchandises d'exportation*; c'est sur ce système que repose la présentation de données détaillées sur les marchandises dans *Exportations par marchandises* (n° 65-004 au catalogue) et *Exportations, Commerce de marchandises* (n° 65-202 au catalogue, annuel). Les données sur les importations sont groupées suivant la *Nomenclature canadienne pour le commerce international des marchandises (NCCI)* (manuel de référence n° 65-502F au catalogue) et bien qu'il n'existe aucune publication faisant état de ce genre de données, celles-ci peuvent être fournies sur demande. La NCCI a été combinée à la *Classification des marchandises d'importation*, sur laquelle repose la présentation de données détaillées sur les marchandises dans *Importations par marchandises* (n° 65-007 au catalogue) et *Importations, Commerce de marchandises* (n° 65-203 au catalogue, annuel).

Pour la présentation de données détaillées sur les marchandises dans *Sommaire du commerce international du Canada* (n° 65-001 au catalogue), *Exportations par pays* (n° 65-003 au catalogue) et *Importations par pays* (n° 65-006 au catalogue), les marchandises d'exportation et d'importation ont été regroupées en catégories sommaires dans leurs systèmes de classification respectifs; cette opération est décrite dans les rapports trimestriels 65-003 et 65-006. Par souci de concision, le *Communiqué préliminaire sur le commerce international du Canada* (n° 65-001P au catalogue) ne donne que les principaux groupes de produits, y compris les totaux de secteurs.

B.7 Classification des pays: La classification des pays utilisée par la Division du commerce international de Statistique Canada a été conçue à des fins de géographie économique et ne reflète pas nécessairement l'opinion du gouvernement du Canada sur les questions de reconnaissance, de souveraineté ou de compétence en matière internationale.

Une classification des pays ainsi qu'une description des limites territoriales servant à des fins statistiques paraissent dans les numéros de janvier des publications *Exportations par marchandises* (n° 65-004 au catalogue) et *Importations par marchandises* (n° 65-007 au catalogue) ainsi que dans les publications annuelles *Exportations*,

65-202) and Imports, Merchandise Trade (Catalogue 65-203). Amendments effective in any year are listed in the blue pages of the January and December issues of catalogues 65-004 and/or 65-007 for that year.

- B.8 Trading Partner Attribution:** Exports are attributed to the country which is the last known destination of the goods at the time of export.

Imports are attributed to the country from which the goods were first consigned to Canada, whether or not this is the country of origin. An exception is made in the case of goods of Central or South American origin consigned to Canada from the United States; such imports are credited to the country of origin. Imports of crude petroleum from the United States are credited to U.S.A., whatever the origin.

- B.9 Principal Trading Areas:** The "principal trading areas" are country groupings defined as follows:

Other E.E.C.: Belgium, Denmark, France, Germany (F.R.), Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal and Spain. The United Kingdom is also a member of the European Economic Community (E.E.C.) but is sometimes shown separately because of the importance of its trade with Canada. (United Kingdom, Ireland and Denmark joined the E.E.C. on January 1, 1973; Greece on January 1, 1981; and Portugal and Spain on January 1, 1986.)

Other O.E.C.D.: Austria, Finland, Iceland, Norway, Sweden, Switzerland, Turkey, Australia, New Zealand. (The E.E.C. countries, United States, Japan and Canada are also members of O.E.C.D. – the Organization for Economic Cooperation and Development.)

Other America: This group includes all countries and territories of North and South America (other than the United States and Canada) including Greenland, Bermuda and Puerto Rico.

- B.10 Low Value Shipment Estimates:** For both export and import shipments valued at less than \$800, the Customs reporting requirements have been minimized in order to reduce the reporting burden on the Canadian public. As commodity detail is not available from the Revenue Canada administrative sources for low value shipments, the volume of shipments is used to derive a total for this segment of trade. The monthly estimate is published for both export and import trade in class 970-75 "Shipments valued at less than \$800". For exports, the trade estimate for small value shipments is usually less than 0.2 per cent of total Canadian exports and for imports, less than 0.6 per cent.

- B.11 Sampling:** Export documents for shipments to the United States originating from Quebec, Ontario, Manitoba and British Columbia valued at greater than \$800 and less than \$5,000 are subject to a systematic sample (20 per cent) in order to derive estimates for this segment of export trade. Prior to May 1984, the \$800 and \$5,000 value limits were \$500 and \$2,500 respectively.

Commerce de marchandises (n° 65-202 au catalogue) et *Importations, Commerce de marchandises* (n° 65-203 au catalogue). Les modifications apportées au cours d'une année sont indiquées dans les pages bleues des numéros de janvier et de décembre des publications no 65-004 et 65-007 de l'année en question.

- B.8 Désignation des partenaires commerciaux:** Les exportations sont attribuées au pays désigné comme la dernière destination connue des marchandises au moment de l'exportation.

Les importations sont attribuées au pays d'où les marchandises partent pour entrer au Canada, qu'il s'agisse ou non du pays d'origine. Une exception est prévue pour les marchandises qui viennent d'Amérique centrale ou d'Amérique du Sud et qui passent par les États-Unis avant d'arriver au Canada; ces importations sont créditées au pays d'origine. Les importations de pétrole brut en provenance des États-Unis sont attribuées à ce pays, quel que soit le pays d'origine.

- B.9 Principales zones commerciales:** Les principales zones commerciales sont les groupes de pays suivants:

Autres C.É.E.: Belgique, Danemark, France, Allemagne de l'Ouest, Grèce, Irlande, Italie, Luxembourg, Pays-Bas, Portugal et Espagne. Le Royaume-Uni fait également partie de la Communauté économique européenne (C.É.E.) mais est parfois considéré séparément à cause de l'importance de ses liens commerciaux avec le Canada. (Le Royaume-Uni, l'Irlande et le Danemark se sont joints à la C.É.E. le 1er janvier 1973, la Grèce le 1er janvier 1981 et le Portugal et l'Espagne, le 1er janvier 1986.)

Autres O.C.D.É.: Autriche, Finlande, Islande, Norvège, Suède, Suisse, Turquie, Australie, Nouvelle-Zélande. (Les pays membres de la C.É.E., les États-Unis, le Japon et le Canada font également partie de l'O.C.D.É. – Organisation de coopération et de développement économiques.)

Autres Amériques: Ce groupe comprend tous les pays et territoires d'Amérique du Nord et d'Amérique du Sud (sauf les États-Unis et le Canada), y compris le Groënland, les Bermudes et Porto Rico.

- B.10 Estimation des expéditions de faible valeur:** Pour alléger le fardeau administratif imposé au public canadien, les autorités douanières ont réduit au minimum les formalités de déclaration relatives aux exportations et aux importations d'une valeur inférieure à \$800. Comme les sources administratives de Revenu Canada ne produisent pas de données détaillées sur la composition des expéditions de faible valeur, on se sert du volume des expéditions pour calculer un total pour cette catégorie d'échanges commerciaux. L'estimation mensuelle des exportations et des importations est publiée sous la classe 970-75 "Expéditions d'une valeur inférieure à \$800". Selon les estimations, les expéditions de faible valeur représentent habituellement moins de 0.2 pour-cent du total des exportations canadiennes et moins de 0.6 pour-cent du total des importations canadiennes.

- B.11 Échantillonnage:** Les documents d'exportation concernant les marchandises qui quittent le Québec, l'Ontario, le Manitoba et la Colombie-Britannique à destination des États-Unis et dont la valeur se situe entre \$800 et \$5,000 sont soumis à un échantillonnage systématique (20 pour-cent) afin d'obtenir des estimations pour ce secteur du commerce d'exportation. Avant le mois de mai 1984, les limites de \$800 et de \$5,000 étaient respectivement de \$500 et de \$2,500.

It should be noted that the export estimates for the sample segment account for 3.3 per cent in terms of value of all exports to the United States whereas in terms of individual transactions it represents some 30 per cent of exportations destined for the United States.

B.12 Merchandise Trade Data on a Balance of Payments Basis: Customs based merchandise trade statistics cover physical movements of goods as they are reflected on Customs documents received in any period, whereas Balance of Payments adjusted data are intended to cover all economic transactions between residents and non-residents. Some of the adjustments applied to the Customs based data are to account for coverage, timing and transportation charges. For further explanation of the Balance of Payments adjustments which are applied to the Customs based trade statistics, please refer to the monthly *Summary of Canadian International Trade* (Catalogue 65-001).

B.13 Seasonal Adjustment: The majority of international trade data show fluctuations. In order to isolate turning points or trends in the basic data, it is necessary to eliminate this effect of seasonal movement. Seasonally adjusted trade data on a balance of payments basis are published in the *Preliminary Statement of Canadian International Trade* (Catalogue 65-001P) and the *Summary of Canadian International Trade* (Catalogue 65-001).

C.0 Other Subjects:

C.1 Abbreviations: Descriptions of countries and commodities used in trade publications are often abbreviated or shortened for publication purposes. A key to abbreviations of countries appears in the publications *Exports by Commodities* (Catalogue 65-004), *Imports by Commodities* (Catalogue 65-007), *Exports Merchandise Trade* (Catalogue 65-202) and *Imports, Merchandise Trade* (Catalogue 65-203) while complete commodity descriptions are available in the *Export Commodity Classification* and the *Canadian International Trade Classification* (Catalogue 65-502E). The letters "n.e.s" mean "not elsewhere specified".

C.2 Quantities: Units of measure are available in the publications *Exports by Commodities* (Catalogue 65-004), *Imports by Commodities* (Catalogue 65-007), *Exports, Merchandise Trade* (Catalogue 65-202) and *Imports, Merchandise Trade* (Catalogue 65-203). A definition of each unit is provided at the beginning of these publications. Measures of weight and volume generally exclude any packing required for shipment and "numbers" refer to complete (or substantially complete) units exported or imported, excluding parts.

C.3 Provincial Detail: Prior to April 1984, export statistics by province of lading indicated the province in which the goods were first laden aboard a carrier for export. In certain cases this may vary from a province of origin definition which represents the province in which the goods were grown, extracted or manufactured.

Il convient de souligner que d'après les estimations ce secteur du commerce d'exportation représente 3.3 pour-cent de la valeur totale des exportations destinées aux États-Unis et environ 30 pour-cent du nombre total de transactions correspondantes.

B.12 Statistiques sur le commerce de marchandises établies sur la base de la balance des paiements: Les statistiques sur le commerce de marchandises établies sur une base douanière concernent les mouvements de marchandises rapportés dans les documents douaniers produits pendant une période donnée tandis que les statistiques établies en fonction de la balance des paiements sont destinées à couvrir toutes les transactions économiques entre des résidents et des non-résidents. Les données établies sur une base douanière sont rectifiées en partie pour tenir compte du champ d'observation, de la période visée et des frais de transport. Pour plus de renseignements sur l'ajustement en fonction de la balance des paiements des statistiques établies sur une base douanière, veuillez consulter la publication mensuelle *Sommaire du commerce international du Canada* (n° 65-001 au catalogue).

B.13 Désaisonnalisation: La majeure partie des données sur le commerce international présentent des fluctuations à caractère répétitif. Afin d'isoler les points de retournement ou les tendances dans les données de base, il est nécessaire d'éliminer cet effet de mouvement saisonnier. Les données désaisonnalisées établies en fonction de la balance des paiements sont publiées dans *Communiqué préliminaire sur le commerce international du Canada* (n° 65-001P au catalogue) et dans *Sommaire du commerce international du Canada* (n° 65-001 au catalogue).

C.0 Autres sujets:

C.1 Abréviations: Les noms des pays et des marchandises figurant dans les documents sur le commerce sont souvent indiqués en abrégé pour les besoins de la publication. Un tableau explicatif des abréviations des noms de pays figure dans les publications *Exportations par marchandises* (n° 65-004 au catalogue), *Importations par marchandises* (n° 65-007 au catalogue), *Exportations, Commerce de marchandises* (n° 65-202 au catalogue) et *Importations, Commerce de marchandises* (n° 65-203 au catalogue) tandis qu'une liste complète des marchandises et de leurs abréviations se trouve dans la *Classification des marchandises d'exportation* et la *Nomenclature canadienne pour le commerce international des marchandises* (n° 65-502F au catalogue). Les lettres "n.d.a." signifient "non dénommé ailleurs".

C.2 Quantités: Les unités de mesure sont énumérées dans les publications *Exportations par marchandises* (n° 65-004 au catalogue), *Importations par marchandises* (n° 65-007 au catalogue), *Exportations, Commerce de marchandises* (n° 65-202 au catalogue) et *Importations, Commerce de marchandises* (n° 65-203 au catalogue). Chaque unité est définie dans les premières pages de ces publications. Les mesures de poids et de volume ne tiennent habituellement pas compte de l'emballage et les nombres absolus représentent des unités complètes (ou presque complètes) exportées ou importées, à l'exclusion des pièces.

C.3 Statistiques provinciales: Avant avril 1984, les statistiques sur les exportations selon la province de chargement indiquaient la province où les marchandises étaient initialement confiées à un transporteur pour être exportées. La province de chargement ne correspond pas toujours à la province d'origine, celle-ci étant définie comme la province où les produits ont été cultivés, extraits ou fabriqués.

In April 1984, Statistics Canada and Customs & Excise, Revenue Canada took measures to have export shipments reported on a province of origin basis instead of province of lading. It is recognized that in certain cases the exporting community will be unable to report the exact provincial origin of the goods. This will happen, for instance, when goods for export are taken from stock or inventory that originated from several provinces.

Import statistics by province of clearance indicate the province in which the goods were cleared by Customs either for immediate consumption or for entry into a bonded Customs warehouse; this may not always coincide with the province in which the goods are consumed.

C.4 Revisions:

a. **Data for current month:** Statistics for the current month published in the *Preliminary Statement of Canadian International Trade* (Catalogue 65-001P) and in the *Summary of Canadian International Trade* (Catalogue 65-001) contain preliminary figures. These figures are further revised and then published in *Exports by Commodities* (Catalogue 65-004), *Imports by Commodities* (Catalogue 65-007), *Exports by Countries* (Catalogue 65-003) and *Imports by Countries* (Catalogue 65-006).

b. **Data for previous months of the current year:** Figures for previous months of the current year remain subject to revision until the December and annual reports have been published. In the case of the *Summary of Canadian International Trade* (Catalogue 65-001), the revised December figures appear in the January issue of the following year. Commodity by country sub-totals revised by \$10,000 or more in any monthly publication are shown at the beginning of the monthly reports 65-004 and 65-007.

c. **Data for the previous year:** Further revisions to monthly data of the previous year appear in the December issue of the following year. Commodity by Country figures revised at that time are shown at the beginning of the reports 65-004 and 65-007.

d. **Cumulative totals** in all reports reflect the revisions applied up to the date of printing.

C.5 **Indexes of Price and Volume:** Price and volume indexes are published in the *Preliminary Statement of Canadian International Trade* (Catalogue 65-001P) and the *Summary of Canadian International Trade* (Catalogue 65-001). Paasche price indexes which are current-weighted are calculated from price relatives based on 1981 = 100. The weights are trade values for the month, quarter or year to which the index refers and hence change from period to period. The Laspeyres volume index is derived by dividing a value index by the corresponding Paasche price index and is, therefore, weighted with fixed 1981 price weights.

The price indicators selected are either commodity unit values calculated directly from the trade statistics or, particularly in the case of end products, price indexes obtained from other Canadian or foreign sources.

En avril 1984, Statistique Canada et Revenu Canada – Douanes et Accise ont pris des mesures pour que les livraisons à l'exportation soient déclarées suivant la province d'origine et non plus suivant la province de chargement. Il est certain que les exportateurs ne pourront pas toujours préciser la province d'origine. Ce sera effectivement le cas lorsque des marchandises destinées à l'exportation proviendront de stocks de différentes provinces.

Les statistiques sur les importations selon la province de dédouanement indiquent la province où les marchandises ont passé à la douane pour être ensuite consommées immédiatement ou expédiées vers un entrepôt de douane; la province de dédouanement ne correspond pas toujours à la province où sont consommés les produits en question.

C.4 Rectifications:

a. **Données du mois courant:** Les statistiques du mois courant publiées dans *Communiqué préliminaire sur le commerce international du Canada* (n° 65-001P au catalogue) et dans *Sommaire du commerce international du Canada* (n° 65-001 au catalogue) sont des données préliminaires. Une fois révisées, elles sont publiées dans *Exportations par marchandises* (n° 65-004 au catalogue), *Importations par marchandises* (n° 65-007 au catalogue), *Exportations par pays* (n° 65-003 au catalogue), et *Importations par pays* (n° 65-006 au catalogue).

b. **Données des mois précédents de l'année courante:** Les données des mois précédents de l'année courante sont sujettes à révision jusqu'à la parution du rapport mensuel de décembre et du rapport annuel. Pour ce qui est du *Sommaire du commerce international du Canada* (n° 65-001 au catalogue), les données de décembre révisées paraissent dans le numéro de janvier de l'année suivante. Les révisions de \$10,000 ou plus appliquées aux sous-totaux par marchandise et par pays dans n'importe quelle publication mensuelle sont indiquées au début des rapports mensuels nos 65-004 et 65-007.

c. **Données de l'année précédente:** Les rectifications additionnelles apportées aux données mensuelles de l'année précédente paraissent dans l'édition de décembre de l'année suivante. Les chiffres par marchandise et par pays, qui sont déjà rectifiés à ce moment-là, paraissent au début des rapports nos 65-004 et 65-007.

d. Les totaux cumulatifs figurant dans toutes les publications tiennent compte des rectifications qui ont été apportées jusqu'à la date de l'impression.

C.5 **Indices de prix et de volume:** Les indices de prix et de volume sont publiés dans *Communiqué préliminaire sur le commerce international du Canada* (n° 65-001P au catalogue) et *Sommaire du commerce international du Canada* (n° 65-001 au catalogue). Les indices de prix Paasche, à pondération courante, sont calculés à l'aide de rapports de prix de base 1981 = 100. Les poids sont des valeurs marchandes pour le mois, le trimestre ou l'année auxquels se rapporte l'indice et, de ce fait, ils varient d'une période à une autre. L'indice de volume Laspeyres s'obtient en divisant un indice de valeur par l'indice de prix Paasche correspondant et est par conséquent pondéré au moyen de prix fixes de 1981.

Les indices de prix choisis sont soit des valeurs unitaires de produits, calculées directement à partir des statistiques sur le commerce, ou, surtout en ce qui concerne les produits finals, des indices de prix obtenus d'autres sources canadiennes ou de sources étrangères.

Current and fixed weighted export and import price and volume indexes on a Balance of Payments Basis for all countries presented in Part I of the *Summary of Canadian International Trade* (Catalogue 65-001) are also available on CANSIM in matrices 3633 to 3638. Comparable Customs based current and fixed weighted price indexes for the United States are available on CANSIM in matrices 3639 to 3642. In addition, these matrices contain the All Country and United States indexes in terms of the 10 Sections of the *Standard International Trade Classification* (SITC).

An explanation of the methodology used to construct the indexes is contained in a reference paper entitled *The 1971-based Price and Volume Indexes of Canada's External Trade*, published in December 1976 as a supplement to the publication (Catalogue 65-001).

C.6 Sources of Further Information: Monthly, quarterly and annual trade statistics are published in the 65-xxx series of Statistics Canada publications. Detailed descriptions and indexes of the commodity classifications are also available. See the Statistics Canada publications catalogue for descriptions of the contents of the various publications. As a result of continuous research on trade statistics, additional reference materials are published from time to time; for example, *The Reconciliation of U.S. - Canada Trade Statistics* (annual) and *Canada's Foreign Trade in Automotive Products* (quarterly), published in the *Statistics Canada Daily* (Catalogue 11-001E) and the occasional publication titled *Canadian International Trading Patterns* (Catalogue 65-503).

In addition, merchandise trade statistics are also available from the International Trade Division (in the form of computer printouts, magnetic tapes diskettes, and microfiche); from the CANSIM network (in matrices: 0021, 0022, 0876 to 0879, 3633 to 3644, 3649 to 3719) and from the Statistics Canada Regional Offices.

Questions concerning details of methods not covered by these notes should be addressed in writing to the Director, International Trade Division, Statistics Canada, Ottawa, Ontario K1A 0T6.

Les indices de prix et de volume des exportations et des importations (à pondération fixe et courante) établis en fonction de la balance des paiements pour tous les pays et présentés dans la première partie du *Sommaire du commerce international du Canada* (n° 65-001 au catalogue) se trouvent également dans les matrices 3633 à 3638 de CANSIM. En outre, les matrices 3639 à 3642 contiennent des indices de prix à pondération fixe ou courante établis sur une base douanière pour les États-Unis. Elles contiennent, de plus, des indices pour "tous les pays" et les "États-Unis" établis en fonction des 10 sections de la *Classification type pour le commerce international* (CTCI).

La méthode de construction des indices est expliquée dans un document de référence intitulé *Les indices de prix et de volume de base 1971 du commerce extérieur du Canada* et publié en décembre 1976 sous forme de supplément à la publication (n° 65-001 au catalogue).

C.6 Sources de renseignements supplémentaires: Les statistiques mensuelles, trimestrielles et annuelles plus détaillées sur le commerce paraissent dans la série 65-xxx des publications de Statistique Canada. On peut également obtenir une description détaillée des catégories de marchandises et connaître les indices des classifications de marchandises qui s'y rapportent. Veuillez consulter le catalogue des publications de Statistique Canada pour connaître le contenu des diverses publications. Grâce à une recherche soutenue en statistique du commerce, de nouveaux documents de référence paraissent de temps à autre; mentionnons, par exemple, *Rapprochement des statistiques du commerce États-Unis - Canada* (annuel) et *Commerce des produits de l'automobile avec les autres pays* (trimestriel), tous deux publiés dans *Le quotidien de Statistique Canada* (n° 11-001F au catalogue), et la publication hors série intitulée *Profil du commerce international canadien* (n° 65-503 au catalogue).

On peut également se procurer des statistiques sur le commerce de marchandises auprès de la Division du commerce international (sous forme d'imprimés d'ordinateur, de bandes magnétiques, de disquettes ou de microfiches), du réseau CANSIM (matrices 0021, 0022, 0876 à 0879, 3633 à 3644, 3649 à 3719) et des bureaux régionaux de Statistique Canada.

Toute question portant sur un aspect des méthodes qui n'aurait pas été traité dans les pages précédentes doit être adressée par écrit au directeur de la Division du commerce international, Statistique Canada, Ottawa (Ontario), K1A 0T6.

Data In Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer printouts, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Trade Information Unit,
International Trade Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9647) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(973-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Newfoundland and Labrador	Zenith 0-7037
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192
Quebec	1-800-361-2831

Credit card only (973-8018)

Des données sous plusieurs formes...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Sous-section des renseignements sur le commerce,
Division du commerce international,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-9647) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(973-6586)	Vancouver	(666-3691)

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, **aux utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres régionaux de consultation.

Notice to Users

As a result of required changes to the computing system which produces the International Trade publications, there has been an improvement in the precision of our statistical data. Therefore quantities may differ slightly from those previously published.

Note aux utilisateurs

Les changements requis au système de calcul qui produit les publications du commerce international, nous donnent une amélioration dans la précision de nos données statistiques. Ainsi les quantités peuvent avoir une légère différence de celles publiées antérieurement.

Merchandise Trade Conceptual Framework

A.0 Sources of Statistics: Canada's international trade statistics are tabulated from copies of administrative documents, summarized reports and computer files collected by Revenue Canada, Customs. When goods are imported into or exported from Canada, a document or report must be filed with Customs giving such descriptions of the goods and details of the transaction as are required for the purposes of Customs administration. It follows that the method of compilation for international trade statistics is determined and limited to some extent by Customs regulations and procedures.

Statistics on trade in electricity and on exports of crude petroleum and natural gas cannot, because of timing, be obtained from Customs documents. Instead, trade in electricity is reported through the National Energy Board, while statistics on exports of crude petroleum and natural gas (by pipeline) are collected directly by the Industry Division of Statistics Canada.

Low value export and import shipments are subjected to sampling or derived by various estimating techniques; refer to Note B.10 and B.11 for further information.

B.0 Concepts and Definitions Used in the Compilation of Canadian International Trade Statistics:

B.1 System of Trade: Canadian statistics are tabulated according to the "general" system of trade. Imports include all goods which have crossed Canada's territorial boundary, whether they are entered through Customs for immediate consumption in Canada or stored in bonded Customs warehouses. Domestic exports include goods grown, extracted or manufactured in Canada (including goods of foreign origin which have been materially transformed in Canada). Re-exports are exports of goods of foreign origin which have not been materially transformed in Canada (including goods withdrawn for export from bonded Customs warehouses). Total exports are the sum of Domestic exports and Re-exports.

The trade statistics do not include exports to Canadian diplomatic or military posts abroad nor imports by foreign diplomatic or military posts in Canada because such posts are considered to be within the geographical boundary of the sponsor country. Purchases or sales of bunker supplies and stores for ships or aircraft engaged in international traffic and settlers' effects are excluded for practical reasons. Goods which cross the Canadian border for convenience of transportation only (in-transit) are not included in trade statistics.

B.2 Coverage: Merchandise trade includes only goods which add to or subtract from the stock of material resources in Canada as a result of their movement across the Canadian border. Consequently, goods intended to be returned to the exporting country after a short period of time are excluded from trade statistics. Examples of such transactions are works of art loaned for exhibition, vehicles or horses exported

Commerce de marchandises cadre conceptuel

A.0 Sources des statistiques: Les statistiques sur le commerce international du Canada sont totalisées à partir de documents administratifs, d'états récapitulatifs et de fichiers informatiques recueillis par Revenu Canada (Douanes). Lorsque des marchandises entrent au Canada ou en sortent, il faut remplir une déclaration précisant la nature de ces marchandises et les modalités de la transaction, conformément à la réglementation de l'administration douanière. Il s'ensuit que la méthode de collecte des statistiques sur le commerce international est déterminée et limitée jusqu'à un certain point par les règlements et les procédures des douanes.

Les statistiques sur le commerce de l'énergie électrique et l'exportation de pétrole brut et de gaz naturel ne peuvent, pour des raisons qui ont trait à la période de collecte des données, être établies à partir de documents de douane. Les données sur le commerce de l'énergie électrique sont plutôt obtenues par l'intermédiaire de l'Office national de l'énergie, tandis que les statistiques sur les exportations de pétrole brut et de gaz naturel (par pipeline) sont recueillies directement par la Division de l'industrie de Statistique Canada.

Les exportations et les importations de marchandises de faible valeur sont soumises à un échantillonnage ou calculées à l'aide de diverses méthodes d'estimation; voir les notes B.10 et B.11 pour plus de renseignements.

B.0 Concepts et définitions utilisés dans la production de statistiques sur le commerce international du Canada:

B.1 Système commercial: Les statistiques du Canada sont totalisées selon le système commercial "général". Les importations comprennent tous les biens qui ont franchi les frontières du Canada, que ces biens aient passé à la douane pour être consommés immédiatement au Canada ou aient été expédiés vers un entrepôt de douane. Les exportations nationales comprennent les biens cultivés, extraits ou fabriqués au Canada (y compris les biens d'origine étrangère qui ont été transformés au Canada). Les réexportations sont des exportations de biens d'origine étrangère qui n'ont pas été transformés au Canada (y compris les biens retirés des entrepôts de douane pour être exportés). Les exportations totales correspondent à la somme des exportations nationales et des réexportations.

Les statistiques sur le commerce ne couvrent pas les exportations vers des missions diplomatiques ou des bases militaires canadiennes à l'étranger ni les importations attribuables à des missions diplomatiques ou à des bases militaires étrangères au Canada puisqu'on considère ces établissements à l'intérieur des limites géographiques du pays qu'ils représentent. Les achats ou les ventes de ravitaillement pour les navires ou les avions affectés au transport international et les effets des immigrants sont exclus pour des raisons pratiques. Les biens auxquels on fait franchir la frontière canadienne uniquement pour en faciliter le transport sont également exclus des statistiques sur le commerce.

B.2 Champ d'observation: Le commerce de marchandises ne comprend que les biens dont le passage d'un côté à l'autre de la frontière canadienne augmente ou diminue le stock de ressources matérielles du Canada. Ainsi, les biens qui doivent être retournés dans le pays exportateur après un court laps de temps sont exclus des statistiques sur le commerce. Citons à titre d'exemple les oeuvres d'art prêtées pour une exposition, les véhicules ou les chevaux exportés en

to compete in races, and films exported for processing and return. The value of goods exported or imported for purposes of repair only are excluded from trade statistics, although payments or receipts for the repairs are included. Financial assets such as circulating coins, stocks, and bonds are also excluded from trade statistics.

B.3 Valuation: *Exports* are recorded at the values declared on export documents, which usually reflect the actual selling price or, in the case of non-arm's-length transactions, the transfer price used for company accounting purposes. Most exports are valued at the place in Canada where they are laden aboard a carrier for export but some exports by water reflect values which include transportation charges to the port of export. Some overland shipments to the United States are recorded at a value which includes part or all of the transportation charges to the ultimate destination because such transportation charges cannot be identified and removed.

For Customs duty purposes, *imports* are recorded at values established according to the provisions of the Customs Act.

Prior to 1985, the Customs Act required the value for duty to reflect the highest of the selling price or the fair market value of the goods, i.e., the price at which similar goods could be sold on the domestic market of the exporting country. The selling price of the goods was recorded for statistical purposes. In practice, the fair market value and the selling price proved to be identical in most cases; therefore, few adjustments were required.

Effective January 1, 1985, these provisions were amended to reflect valuation methods based on the General Agreement on Tariffs and Trade (GATT) Valuation Code system which generally requires the value for duty of imported goods to be equivalent to the transaction value (i.e., the actual price paid for the goods).

Studies of the data for 1985 indicate that the transaction value is employed as the value for duty for approximately 95 per cent of import trade. For the remaining 5 per cent an alternative method of valuation was used in lieu of the transaction value. Analysis of these transactions indicated that the adjustments to the transaction value for Customs purposes were negligible under the new valuation code system; therefore, the value at which Canadian merchandise imports are recorded for statistical purposes is equivalent to the actual price paid for imported goods exclusive of charges such as freight and insurance.

Values appearing in most publications are presented in thousands of Canadian dollars. All totals and cumulative values are calculated from unrounded figures and rounded independently; therefore they will often differ from the sum of the rounded figures.

vue d'une course et les films exportés dans le but d'être développés, puis retournés. Les biens exportés ou importés uniquement à des fins de réparation ne sont pas couverts par les statistiques sur le commerce bien que les recettes ou les paiements y afférents le soient. Les éléments d'actif financier tels les pièces de monnaie en circulation, les actions et les obligations sont également exclus des statistiques sur le commerce.

B.3 Évaluation: *Les exportations* sont enregistrées selon la valeur déclarée dans les documents d'exportation; il s'agit habituellement du prix de vente réel ou, dans le cas des opérations entre entreprises affiliées, du prix de transfert adopté par les sociétés à des fins comptables. La plupart des exportations sont évaluées à l'endroit au Canada où elles sont confiées à un transporteur pour être expédiées à l'extérieur du pays; toutefois, le prix de certaines marchandises expédiées par bateau comprend les frais pour le transport vers le port d'exportation. Pour certaines marchandises expédiées par voie de terre aux États-Unis, la valeur indiquée comprend une partie ou la totalité des frais de transport jusqu'à la destination finale puisqu'il n'est pas possible d'isoler ni de retrancher ces frais.

Aux fins du prélèvement des droits de douanes *les importations* sont présentées selon les valeurs établies conformément aux dispositions de la Loi sur les douanes.

Avant 1985, la Loi sur les douanes stipulait que la valeur en douane représentait le prix de vente ou la juste valeur marchande, c'est-à-dire le prix auquel les marchandises importées se vendaient sur le marché intérieur du pays exportateur. En pratique la juste valeur marchande et le prix de vente dans la plupart des cas étaient identiques; par conséquent peu d'ajustements étaient nécessaires.

À la suite de modifications entrées en vigueur le 1^{er} janvier 1985, la Loi sur les douanes prévoit maintenant l'application de méthodes d'évaluation fondées sur le Code d'évaluation de l'Accord général sur les tarifs douaniers et le commerce (GATT); selon ce code, la valeur imposable des marchandises importées doit normalement correspondre à la valeur de la transaction (c'est-à-dire au prix réellement payé pour les marchandises).

Selon une analyse des données de 1985, la valeur de la transaction est reconnue comme la valeur imposable pour environ 95 pour-cent des importations. Le 5 pour-cent restant a été soumis à une méthode d'évaluation différente. Une analyse de ces transactions a montré que la différence entre la valeur de la transaction et la valeur en douane a été négligeable en vertu du nouveau code d'évaluation; par conséquent, on peut considérer que la valeur des importations canadiennes de marchandises utilisée dans les rapports statistiques correspond au prix réellement payé pour ces importations, abstraction faite de charges comme les frais de transport et l'assurance.

Les données figurant dans la plupart des publications sont exprimées en milliers de dollars canadiens. Comme tous les totaux et totaux cumulatifs sont obtenus à partir de chiffres non arrondis, puis arrondis indépendamment, ils différeront souvent du total des chiffres arrondis.

B.4 Timing: The closing of the statistical month is defined according to the last calendar day of the month, based, as closely as practicable, on the date of clearance from Customs. A small number of individual shipments may not be recorded in statistics until some time after their arrival or departure because of administrative procedures which permit late filing of documents.

Trade data for electricity, exports of both crude petroleum and natural gas, and imports of crude petroleum from the United States are collected too late for inclusion in statistics for the current month; therefore, trade values for the current month are imputed on the basis of previous months' data and revised with the true value in the following statistical month.

B.5 Treatment of Confidential Information: It is occasionally necessary to withhold publication of details where commodity or country information is known to involve disclosure. The suppression of commodity or country detail, however, does not affect aggregate totals, which include all transactions reported during the calendar month.

B.6 Commodity Classification: Export data is classified using the *Export Commodity Classification* and this serves as the basis for the commodity detail published in *Exports by Commodities* (Catalogue 65-004) and *Exports, Merchandise Trade* (Catalogue 65-202 annual). Import data is classified using the *Canadian International Trade Classification (CITC)* (reference manual Catalogue 65-502E) and, although this level of detail is not available in publication format, it can be provided on request. The CITC classification has been aggregated to the *Import Commodity Classification* which serves as the basis for the commodity detail published in *Imports by Commodities* (Catalogue 65-007) and *Imports, Merchandise Trade* (Catalogue 65-203 annual).

For purposes of presenting commodity detail in the *Summary of Canadian International Trade* (Catalogue 65-001), *Exports by Countries* (Catalogue 65-003) and *Imports by Countries* (Catalogue 65-006), both the export and import commodity classifications have been further aggregated to summary categories as described in the quarterly reports 65-003 and 65-006. The *Preliminary Statement of Canadian International Trade* (Catalogue 65-001P), for reasons of brevity, provides only major commodity groups including section totals.

B.7 Country Classification: The country classification employed by the International Trade Division of Statistics Canada is designed for purposes of economic geography and does not necessarily reflect the views or intentions of the Government of Canada on international issues of recognition, sovereignty or jurisdiction.

A classification of countries with a statement of territorial limits used for statistical purposes is shown in the January issues of the publications *Exports by Commodities* (Catalogue 65-004) and *Imports by Commodities* (Catalogue 65-007), and in the annual publications *Exports, Merchandise Trade* (Catalogue

B.4 Période: La fin du mois statistique correspond au dernier jour du mois civil pour lequel il est possible d'obtenir des données sur le dédouanement. Il se peut qu'un petit nombre d'expéditions ne soient pas enregistrées dès leur départ ou dès leur arrivée à cause des formalités administratives qui permettent une production tardive des documents.

Les données sur le commerce de l'énergie électrique, sur les exportations de pétrole brut et de gaz naturel et sur les importations de pétrole brut en provenance des États-Unis sont recueillies trop tard pour être incluses dans les statistiques du mois courant. Par conséquent, les valeurs marchandes applicables au mois courant sont imputées au moyen des données du mois précédent, puis rajustées au cours du mois statistique suivant en fonction des valeurs observées.

B.5 Renseignements confidentiels: Il est parfois nécessaire de supprimer le détail de données concernant certaines marchandises ou certains pays afin de protéger le caractère confidentiel de ces données. La suppression du détail des marchandises ou des pays ne modifie toutefois pas les totaux agrégés, qui comprennent toutes les opérations rapportées au cours du mois civil.

B.6 Classification des marchandises: Les données sur les exportations sont groupées selon la *Classification des marchandises d'exportation*; c'est sur ce système que repose la présentation de données détaillées sur les marchandises dans *Exportations par marchandises* (n° 65-004 au catalogue) et *Exportations, Commerce de marchandises* (n° 65-202 au catalogue, annuel). Les données sur les importations sont groupées suivant la *Nomenclature canadienne pour le commerce international des marchandises (NCCI)* (manuel de référence n° 65-502F au catalogue) et bien qu'il n'existe aucune publication faisant état de ce genre de données, celles-ci peuvent être fournies sur demande. La NCCI a été combinée à la *Classification des marchandises d'importation*, sur laquelle repose la présentation de données détaillées sur les marchandises dans *Importations par marchandises* (n° 65-007 au catalogue) et *Importations, Commerce de marchandises* (n° 65-203 au catalogue, annuel).

Pour la présentation de données détaillées sur les marchandises dans *Sommaire du commerce international du Canada* (n° 65-001 au catalogue), *Exportations par pays* (n° 65-003 au catalogue) et *Importations par pays* (n° 65-006 au catalogue), les marchandises d'exportation et d'importation ont été regroupées en catégories sommaires dans leurs systèmes de classification respectifs; cette opération est décrite dans les rapports trimestriels 65-003 et 65-006. Par souci de concision, le *Communiqué préliminaire sur le commerce international du Canada* (n° 65-001P au catalogue) ne donne que les principaux groupes de produits, y compris les totaux de secteurs.

B.7 Classification des pays: La classification des pays utilisée par la Division du commerce international de Statistique Canada a été conçue à des fins de géographie économique et ne reflète pas nécessairement l'opinion du gouvernement du Canada sur les questions de reconnaissance, de souveraineté ou de compétence en matière internationale.

Une classification des pays ainsi qu'une description des limites territoriales servant à des fins statistiques paraissent dans les numéros de janvier des publications *Exportations par marchandises* (n° 65-004 au catalogue) et *Importations par marchandises* (n° 65-007 au catalogue) ainsi que dans les publications annuelles *Exportations*,

65-202) and *Imports, Merchandise Trade* (Catalogue 65-203). Amendments effective in any year are listed in the blue pages of the January and December issues of catalogues 65-004 and/or 65-007 for that year.

- B.8 Trading Partner Attribution:** Exports are attributed to the country which is the last known destination of the goods at the time of export.

Imports are attributed to the country from which the goods were first consigned to Canada, whether or not this is the country of origin. An exception is made in the case of goods of Central or South American origin consigned to Canada from the United States; such imports are credited to the country of origin. Imports of crude petroleum from the United States are credited to U.S.A., whatever the origin.

- B.9 Principal Trading Areas:** The "principal trading areas" are country groupings defined as follows:

Other E.E.C.: Belgium, Denmark, France, Germany (F.R.), Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal and Spain. The United Kingdom is also a member of the European Economic Community (E.E.C.) but is sometimes shown separately because of the importance of its trade with Canada. (United Kingdom, Ireland and Denmark joined the E.E.C. on January 1, 1973; Greece on January 1, 1981; and Portugal and Spain on January 1, 1986.)

Other O.E.C.D.: Austria, Finland, Iceland, Norway, Sweden, Switzerland, Turkey, Australia, New Zealand. (The E.E.C. countries, United States, Japan and Canada are also members of O.E.C.D. – the Organization for Economic Cooperation and Development.)

Other America: This group includes all countries and territories of North and South America (other than the United States and Canada) including Greenland, Bermuda and Puerto Rico.

- B.10 Low Value Shipment Estimates:** For both export and import shipments valued at less than \$800, the Customs reporting requirements have been minimized in order to reduce the reporting burden on the Canadian public. As commodity detail is not available from the Revenue Canada administrative sources for low value shipments, the volume of shipments is used to derive a total for this segment of trade. The monthly estimate is published for both export and import trade in class 970-75 "Shipments valued at less than \$800". For exports, the trade estimate for small value shipments is usually less than 0.2 per cent of total Canadian exports and for imports, less than 0.6 per cent.

- B.11 Sampling:** Export documents for shipments to the United States originating from Quebec, Ontario, Manitoba and British Columbia valued at greater than \$800 and less than \$5,000 are subject to a systematic sample (20 per cent) in order to derive estimates for this segment of export trade. Prior to May 1984, the \$800 and \$5,000 value limits were \$500 and \$2,500 respectively.

Commerce de marchandises (n° 65-202 au catalogue) et *Importations, Commerce de marchandises* (n° 65-203 au catalogue). Les modifications apportées au cours d'une année sont indiquées dans les pages bleues des numéros de janvier et de décembre des publications no 65-004 et 65-007 de l'année en question.

- B.8 Désignation des partenaires commerciaux:** Les exportations sont attribuées au pays désigné comme la dernière destination connue des marchandises au moment de l'exportation.

Les importations sont attribuées au pays d'où les marchandises partent pour entrer au Canada, qu'il s'agisse ou non du pays d'origine. Une exception est prévue pour les marchandises qui viennent d'Amérique centrale ou d'Amérique du Sud et qui passent par les États-Unis avant d'arriver au Canada; ces importations sont créditées au pays d'origine. Les importations de pétrole brut en provenance des États-Unis sont attribuées à ce pays, quel que soit le pays d'origine.

- B.9 Principales zones commerciales:** Les principales zones commerciales sont les groupes de pays suivants:

Autres C.É.E.: Belgique, Danemark, France, Allemagne de l'Ouest, Grèce, Irlande, Italie, Luxembourg, Pays-Bas, Portugal et Espagne. Le Royaume-Uni fait également partie de la Communauté économique européenne (C.É.E.) mais est parfois considéré séparément à cause de l'importance de ses liens commerciaux avec le Canada. (Le Royaume-Uni, l'Irlande et le Danemark se sont joints à la C.É.E. le 1er janvier 1973, la Grèce le 1er janvier 1981 et le Portugal et l'Espagne, le 1er janvier 1986.)

Autres O.C.D.É.: Autriche, Finlande, Islande, Norvège, Suède, Suisse, Turquie, Australie, Nouvelle-Zélande. (Les pays membres de la C.É.E., les États-Unis, le Japon et le Canada font également partie de l'O.C.D.É. – Organisation de coopération et de développement économiques.)

Autres Amériques: Ce groupe comprend tous les pays et territoires d'Amérique du Nord et d'Amérique du Sud (sauf les États-Unis et le Canada), y compris le Groënland, les Bermudes et Porto Rico.

- B.10 Estimation des expéditions de faible valeur:** Pour alléger le fardeau administratif imposé au public canadien, les autorités douanières ont réduit au minimum les formalités de déclaration relatives aux exportations et aux importations d'une valeur inférieure à \$800. Comme les sources administratives de Revenu Canada ne produisent pas de données détaillées sur la composition des expéditions de faible valeur, on se sert du volume des expéditions pour calculer un total pour cette catégorie d'échanges commerciaux. L'estimation mensuelle des exportations et des importations est publiée sous la classe 970-75 "Expéditions d'une valeur inférieure à \$800". Selon les estimations, les expéditions de faible valeur représentent habituellement moins de 0.2 pour-cent du total des exportations canadiennes et moins de 0.6 pour-cent du total des importations canadiennes.

- B.11 Échantillonnage:** Les documents d'exportation concernant les marchandises qui quittent le Québec, l'Ontario, le Manitoba et la Colombie-Britannique à destination des États-Unis et dont la valeur se situe entre \$800 et \$5,000 sont soumis à un échantillonnage systématique (20 pour-cent) afin d'obtenir des estimations pour ce secteur du commerce d'exportation. Avant le mois de mai 1984, les limites de \$800 et de \$5,000 étaient respectivement de \$500 et de \$2,500.

It should be noted that the export estimates for the sample segment account for 3.3 per cent in terms of value of all exports to the United States whereas in terms of individual transactions it represents some 30 per cent of exportations destined for the United States.

Il convient de souligner que d'après les estimations ce secteur du commerce d'exportation représente 3.3 pour-cent de la valeur totale des exportations destinées aux États-Unis et environ 30 pour-cent du nombre total de transactions correspondantes.

B.12 Merchandise Trade Data on a Balance of Payments Basis: Customs based merchandise trade statistics cover physical movements of goods as they are reflected on Customs documents received in any period, whereas Balance of Payments adjusted data are intended to cover all economic transactions between residents and non-residents. Some of the adjustments applied to the Customs based data are to account for coverage, timing and transportation charges. For further explanation of the Balance of Payments adjustments which are applied to the Customs based trade statistics, please refer to the monthly *Summary of Canadian International Trade* (Catalogue 65-001).

B.12 Statistiques sur le commerce de marchandises établies sur la base de la balance des paiements: Les statistiques sur le commerce de marchandises établies sur une base douanière concernent les mouvements de marchandises rapportés dans les documents douaniers produits pendant une période donnée tandis que les statistiques établies en fonction de la balance des paiements sont destinées à couvrir toutes les transactions économiques entre des résidents et des non-résidents. Les données établies sur une base douanière sont rectifiées en partie pour tenir compte du champ d'observation, de la période visée et des frais de transport. Pour plus de renseignements sur l'ajustement en fonction de la balance des paiements des statistiques établies sur une base douanière, veuillez consulter la publication mensuelle *Sommaire du commerce international du Canada* (n° 65-001 au catalogue).

B.13 Seasonal Adjustment: The majority of international trade data show fluctuations. In order to isolate turning points or trends in the basic data, it is necessary to eliminate this effect of seasonal movement. Seasonally adjusted trade data on a balance of payments basis are published in the *Preliminary Statement of Canadian International Trade* (Catalogue 65-001P) and the *Summary of Canadian International Trade* (Catalogue 65-001).

B.13 Désaisonnalisation: La majeure partie des données sur le commerce international présentent des fluctuations à caractère répétitif. Afin d'isoler les points de retournement ou les tendances dans les données de base, il est nécessaire d'éliminer cet effet de mouvement saisonnier. Les données désaisonnalisées établies en fonction de la balance des paiements sont publiées dans *Communiqué préliminaire sur le commerce international du Canada* (n° 65-001P au catalogue) et dans *Sommaire du commerce international du Canada* (n° 65-001 au catalogue).

C.0 Other Subjects:

C.0 Autres sujets:

C.1 Abbreviations: Descriptions of countries and commodities used in trade publications are often abbreviated or shortened for publication purposes. A key to abbreviations of countries appears in the publications *Exports by Commodities* (Catalogue 65-004), *Imports by Commodities* (Catalogue 65-007), *Exports Merchandise Trade* (Catalogue 65-202) and *Imports, Merchandise Trade* (Catalogue 65-203) while complete commodity descriptions are available in the *Export Commodity Classification* and the *Canadian International Trade Classification* (Catalogue 65-502E). The letters "n.e.s" mean "not elsewhere specified".

C.1 Abréviations: Les noms des pays et des marchandises figurant dans les documents sur le commerce sont souvent indiqués en abrégé pour les besoins de la publication. Un tableau explicatif des abréviations des noms de pays figure dans les publications *Exportations par marchandises* (n° 65-004 au catalogue), *Importations par marchandises* (n° 65-007 au catalogue), *Exportations, Commerce de marchandises* (n° 65-202 au catalogue) et *Importations, Commerce de marchandises* (n° 65-203 au catalogue) tandis qu'une liste complète des marchandises et de leurs abréviations se trouve dans la *Classification des marchandises d'exportation* et la *Nomenclature canadienne pour le commerce international des marchandises* (n° 65-502F au catalogue). Les lettres "n.d.a." signifient "non dénommé ailleurs".

C.2 Quantities: Units of measure are available in the publications *Exports by Commodities* (Catalogue 65-004), *Imports by Commodities* (Catalogue 65-007), *Exports, Merchandise Trade* (Catalogue 65-202) and *Imports, Merchandise Trade* (Catalogue 65-203). A definition of each unit is provided at the beginning of these publications. Measures of weight and volume generally exclude any packing required for shipment and "numbers" refer to complete (or substantially complete) units exported or imported, excluding parts.

C.2 Quantités: Les unités de mesure sont énumérées dans les publications *Exportations par marchandises* (n° 65-004 au catalogue), *Importations par marchandises* (n° 65-007 au catalogue), *Exportations, Commerce de marchandises* (n° 65-202 au catalogue) et *Importations, Commerce de marchandises* (n° 65-203 au catalogue). Chaque unité est définie dans les premières pages de ces publications. Les mesures de poids et de volume ne tiennent habituellement pas compte de l'emballage et les nombres absolus représentent des unités complètes (ou presque complètes) exportées ou importées, à l'exclusion des pièces.

C.3 Provincial Detail: Prior to April 1984, export statistics by province of lading indicated the province in which the goods were first laden aboard a carrier for export. In certain cases this may vary from a province of origin definition which represents the province in which the goods were grown, extracted or manufactured.

C.3 Statistiques provinciales: Avant avril 1984, les statistiques sur les exportations selon la province de chargement indiquaient la province où les marchandises étaient initialement confiées à un transporteur pour être exportées. La province de chargement ne correspond pas toujours à la province d'origine, celle-ci étant définie comme la province où les produits ont été cultivés, extraits ou fabriqués.

In April 1984, Statistics Canada and Customs & Excise, Revenue Canada took measures to have export shipments reported on a province of origin basis instead of province of lading. It is recognized that in certain cases the exporting community will be unable to report the exact provincial origin of the goods. This will happen, for instance, when goods for export are taken from stock or inventory that originated from several provinces.

Import statistics by province of clearance indicate the province in which the goods were cleared by Customs either for immediate consumption or for entry into a bonded Customs warehouse; this may not always coincide with the province in which the goods are consumed.

C.4 Revisions:

- a. **Data for current month:** Statistics for the current month published in the *Preliminary Statement of Canadian International Trade* (Catalogue 65-001P) and in the *Summary of Canadian International Trade* (Catalogue 65-001) contain preliminary figures. These figures are further revised and then published in *Exports by Commodities* (Catalogue 65-004), *Imports by Commodities* (Catalogue 65-007), *Exports by Countries* (Catalogue 65-003) and *Imports by Countries* (Catalogue 65-006).
- b. **Data for previous months of the current year:** Figures for previous months of the current year remain subject to revision until the December and annual reports have been published. In the case of the *Summary of Canadian International Trade* (Catalogue 65-001), the revised December figures appear in the January issue of the following year. Commodity by country sub-totals revised by \$10,000 or more in any monthly publication are shown at the beginning of the monthly reports 65-004 and 65-007.
- c. **Data for the previous year:** Further revisions to monthly data of the previous year appear in the December issue of the following year. Commodity by Country figures revised at that time are shown at the beginning of the reports 65-004 and 65-007.
- d. **Cumulative totals** in all reports reflect the revisions applied up to the date of printing.

C.5 Indexes of Price and Volume: Price and volume indexes are published in the *Preliminary Statement of Canadian International Trade* (Catalogue 65-001P) and the *Summary of Canadian International Trade* (Catalogue 65-001). Paasche price indexes which are current-weighted are calculated from price relatives based on 1981 = 100. The weights are trade values for the month, quarter or year to which the index refers and hence change from period to period. The Laspeyres volume index is derived by dividing a value index by the corresponding Paasche price index and is, therefore, weighted with fixed 1981 price weights.

The price indicators selected are either commodity unit values calculated directly from the trade statistics or, particularly in the case of end products, price indexes obtained from other Canadian or foreign sources.

En avril 1984, Statistique Canada et Revenu Canada - Douanes et Accise ont pris des mesures pour que les livraisons à l'exportation soient déclarées suivant la province d'origine et non plus suivant la province de chargement. Il est certain que les exportateurs ne pourront pas toujours préciser la province d'origine. Ce sera effectivement le cas lorsque des marchandises destinées à l'exportation proviendront de stocks de différentes provinces.

Les statistiques sur les importations selon la province de dédouanement indiquent la province où les marchandises ont passé à la douane pour être ensuite consommées immédiatement ou expédiées vers un entrepôt de douane; la province de dédouanement ne correspond pas toujours à la province où sont consommés les produits en question.

C.4 Rectifications:

- a. **Données du mois courant:** Les statistiques du mois courant publiées dans *Communiqué préliminaire sur le commerce international du Canada* (n° 65-001P au catalogue) et dans *Sommaire du commerce international du Canada* (n° 65-001 au catalogue) sont des données préliminaires. Une fois révisées, elles sont publiées dans *Exportations par marchandises* (n° 65-004 au catalogue), *Importations par marchandises* (n° 65-007 au catalogue), *Exportations par pays* (n° 65-003 au catalogue), et *Importations par pays* (n° 65-006 au catalogue).
- b. **Données des mois précédents de l'année courante:** Les données des mois précédents de l'année courante sont sujettes à révision jusqu'à la parution du rapport mensuel de décembre et du rapport annuel. Pour ce qui est du *Sommaire du commerce international du Canada* (n° 65-001 au catalogue), les données de décembre révisées paraissent dans le numéro de janvier de l'année suivante. Les révisions de \$10,000 ou plus appliquées aux sous-totaux par marchandise et par pays dans n'importe quelle publication mensuelle sont indiquées au début des rapports mensuels nos 65-004 et 65-007.
- c. **Données de l'année précédente:** Les rectifications additionnelles apportées aux données mensuelles de l'année précédente paraissent dans l'édition de décembre de l'année suivante. Les chiffres par marchandise et par pays, qui sont déjà rectifiés à ce moment-là, paraissent au début des rapports nos 65-004 et 65-007.
- d. Les totaux cumulatifs figurant dans toutes les publications tiennent compte des rectifications qui ont été apportées jusqu'à la date de l'impression.

C.5 Indices de prix et de volume: Les indices de prix et de volume sont publiés dans *Communiqué préliminaire sur le commerce international du Canada* (n° 65-001P au catalogue) et *Sommaire du commerce international du Canada* (n° 65-001 au catalogue). Les indices de prix Paasche, à pondération courante, sont calculés à l'aide de rapports de prix de base 1981 = 100. Les poids sont des valeurs marchandes pour le mois, le trimestre ou l'année auxquels se rapporte l'indice et, de ce fait, ils varient d'une période à une autre. L'indice de volume Laspeyres s'obtient en divisant un indice de valeur par l'indice de prix Paasche correspondant et est par conséquent pondéré au moyen de prix fixes de 1981.

Les indices de prix choisis sont soit des valeurs unitaires de produits, calculées directement à partir des statistiques sur le commerce, ou, surtout en ce qui concerne les produits finals, des indices de prix obtenus d'autres sources canadiennes ou de sources étrangères.

Current and fixed weighted export and import price and volume indexes on a Balance of Payments Basis for all countries presented in Part I of the *Summary of Canadian International Trade* (Catalogue 65-001) are also available on CANSIM in matrices 3633 to 3638. Comparable Customs based current and fixed weighted price indexes for the United States are available on CANSIM in matrices 3639 to 3642. In addition, these matrices contain the All Country and United States indexes in terms of the 10 Sections of the *Standard International Trade Classification (SITC)*.

An explanation of the methodology used to construct the indexes is contained in a reference paper entitled *The 1971-based Price and Volume Indexes of Canada's External Trade*, published in December 1976 as a supplement to the publication (Catalogue 65-001).

C.6 Sources of Further Information: Monthly, quarterly and annual trade statistics are published in the 65-xxx series of Statistics Canada publications. Detailed descriptions and indexes of the commodity classifications are also available. See the Statistics Canada publications catalogue for descriptions of the contents of the various publications. As a result of continuous research on trade statistics, additional reference materials are published from time to time; for example, *The Reconciliation of U.S. - Canada Trade Statistics* (annual) and *Canada's Foreign Trade in Automotive Products* (quarterly), published in the *Statistics Canada Daily* (Catalogue 11-001E) and the occasional publication titled *Canadian International Trading Patterns* (Catalogue 65-503).

In addition, merchandise trade statistics are also available from the International Trade Division (in the form of computer printouts, magnetic tapes diskettes, and microfiche); from the CANSIM network (in matrices: 0021, 0022, 0876 to 0879, 3633 to 3644, 3649 to 3719) and from the Statistics Canada Regional Offices.

Questions concerning details of methods not covered by these notes should be addressed in writing to the Director, International Trade Division, Statistics Canada, Ottawa, Ontario K1A 0T6.

Les indices de prix et de volume des exportations et des importations (à pondération fixe et courante) établis en fonction de la balance des paiements pour tous les pays et présentés dans la première partie du *Sommaire du commerce international du Canada* (n° 65-001 au catalogue) se trouvent également dans les matrices 3633 à 3638 de CANSIM. En outre, les matrices 3639 à 3642 contiennent des indices de prix à pondération fixe ou courante établis sur une base douanière pour les États-Unis. Elles contiennent, de plus, des indices pour "tous les pays" et les "États-Unis" établis en fonction des 10 sections de la *Classification type pour le commerce international (CTCI)*.

La méthode de construction des indices est expliquée dans un document de référence intitulé *Les indices de prix et de volume de base 1971 du commerce extérieur du Canada* et publié en décembre 1976 sous forme de supplément à la publication (n° 65-001 au catalogue).

C.6 Sources de renseignements supplémentaires: Les statistiques mensuelles, trimestrielles et annuelles plus détaillées sur le commerce paraissent dans la série 65-xxx des publications de Statistique Canada. On peut également obtenir une description détaillée des catégories de marchandises et connaître les indices des classifications de marchandises qui s'y rapportent. Veuillez consulter le catalogue des publications de Statistique Canada pour connaître le contenu des diverses publications. Grâce à une recherche soutenue en statistique du commerce, de nouveaux documents de référence paraissent de temps à autre; mentionnons, par exemple, *Rapprochement des statistiques du commerce États-Unis - Canada* (annuel) et *Commerce des produits de l'automobile avec les autres pays* (trimestriel), tous deux publiés dans *Le quotidien de Statistique Canada* (n° 11-001F au catalogue), et la publication hors série intitulée *Profil du commerce international canadien* (n° 65-503 au catalogue).

On peut également se procurer des statistiques sur le commerce de marchandises auprès de la Division du commerce international (sous forme d'imprimés d'ordinateur, de bandes magnétiques, de disquettes ou de microfiches), du réseau CANSIM (matrices 0021, 0022, 0876 à 0879, 3633 à 3644, 3649 à 3719) et des bureaux régionaux de Statistique Canada.

Toute question portant sur un aspect des méthodes qui n'aurait pas été traité dans les pages précédentes doit être adressée par écrit au directeur de la Division du commerce international, Statistique Canada, Ottawa (Ontario), K1A 0T6.

INDEX TO THE INVENTORY OF STATISTICS CANADA QUESTIONNAIRES ON MICROFICHE

1985

INDEX DU RÉPERTOIRE DES QUESTIONNAIRES DE STATISTIQUE CANADA SUR MICROFICHES

Canada

■ Inventory of Statistics Canada Questionnaires on Microfiche, 1985

The key to a good survey is a good questionnaire. Well designed questions mean better responses. That translates into better data and saves you time and money. See how we obtain our data at Statistics Canada by consulting our **Inventory of Statistics Canada Questionnaires on Microfiche**.

This well-organized 233 microfiche inventory complete with three ring binder includes all the questionnaires we use to collect statistics (easy reference index available separately in Part II). As well, the administrative forms from other federal and provincial government departments who supply us with statistics make up part of the inventory. Wherever possible, related instruction material for enumerators and respondents is provided.

Catalogue No. 12-205 (Annual),
Bilingual, Published 1986, Canada:
\$160.00, Other countries: \$161.00.

Part I: 233 Microfiche, 12-205M,

\$151.50.

Part II: Index, 12-205S, Canada:
\$15.00, Other countries: \$16.00.

■ Répertoire des questionnaires de Statistique Canada sur microfiches, 1985

Pour réussir une enquête, il faut un bon questionnaire. Des questions bien construites amènent de meilleures réponses. Cela se traduit par des données supérieures et vous permet d'épargner temps et argent. Consultez **Répertoire des questionnaires de Statistique Canada sur microfiches**, et vous saurez comment Statistique Canada recueille ses données.

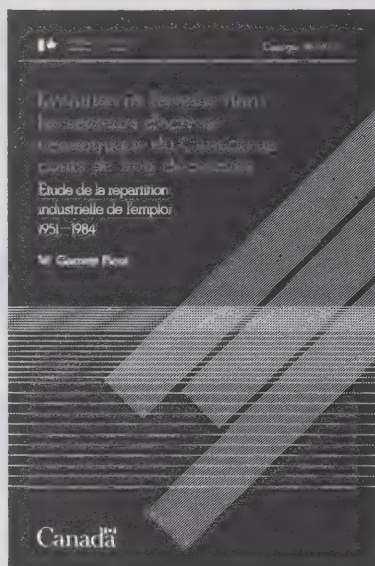

Ce répertoire pratique de 233 microfiches comprend tous les questionnaires utilisés par Statistique Canada pour recueillir des statistiques, le tout présenté dans trois reliures à anneaux (index de consultation facile disponible séparément dans la Partie II). Le répertoire renferme également les formulaires administratifs des autres ministères provinciaux et fédéraux qui nous fournissent des données. Partout où cela est possible, les instructions fournies aux enquêteurs et aux répondants sont incluses.

■ Canada's Industries: Growth in Jobs Over Three Decades A Review of the Changing Industrial Mix of Employment 1951-1984

Which Canadian industries and sectors were responsible for creating the most jobs during the 50s, 60s, 70s and early 80s? To what degree has this changed over time?

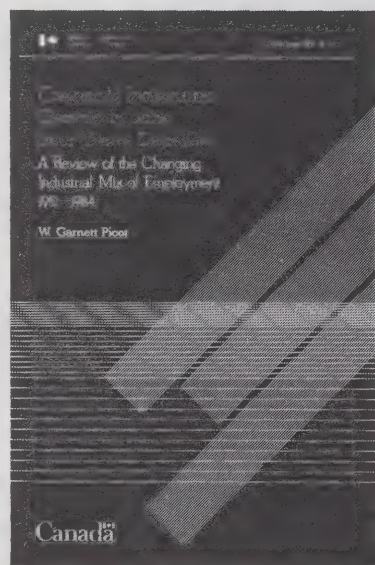

These are just two of the many questions addressed in this report. It reviews employment trends in Canada's industries and service sectors between 1951 and 1984, and explains why the mix of employment among industries has changed.

The report concentrates on two broad factors:

- changes in the demand for goods and services;
- variations among industries in the rate of productivity increase.

Data from a study using input-output analysis are also included to reach some conclusions about the importance of industrial employment during the 1970s.

Catalogue No. 89-507E (Occasional), E. and F., 113 pp., Published 1986, Canada: \$18.00, Other countries: \$19.00.

■ Évolution de l'emploi dans les secteurs d'activité économique du Canada au cours de trois décennies Étude de la répartition industrielle de l'emploi, 1951-1984

Quelles industries et quels secteurs au Canada ont été responsables de la création du plus grand nombre d'emplois durant les années 1950, 1960, 1970 et au début des années 1980? Jusqu'à quel point y a-t-il eu des changements au cours des années?

Ce ne sont là que deux des nombreuses questions auxquelles répond ce rapport. On y passe en revue les tendances de l'emploi dans les secteurs des services et les industries au Canada entre 1951 et 1984, tout en expliquant pourquoi la distribution de l'emploi parmi les industries a changé.

Le rapport se penche sur deux facteurs généraux:

- les changements dans la demande de biens et de services;
- les variations, parmi les industries, du taux de croissance de la productivité.

Le rapport comprend également des données provenant d'une étude élaborée à partir d'une analyse d'entrées-sorties, lesquelles rendent possible la formulation de conclusions quant à l'importance de l'emploi dans l'industrie au cours des années 1970.

Canada: \$18.00, Autres pays: \$19.00.

■ Canadian Standard Industrial Classification for Companies and Enterprises, 1980

Does your marketing, financial or analytical work involve a multitude of Canadian companies? If so, Statistics Canada has just developed a comprehensive framework for classifying your "company-based" records and performance statistics.

Our new **Canadian Standard Industrial Classification for Companies and Enterprises, 1980 (SIC-C)** introduces a hierarchical structure for classifying and coding "company-based" records and data. Our SIC-C will also help your economist to analyze Statistics Canada's financial statistics.

Until now our **Standard Industrial Classification for Establishments (SIC-E)** has been the single authoritative source for classifying economic statistics. While it remains the best instrument for classifying employment and production statistics, the new **SIC-C** will complement its role by providing a convenient method of classifying financial statistics or "company-based" records. Using a framework of 18 main industrial sectors (e.g., Energy, Wood and Paper) the **SIC-C** breaks each sector into a hierarchy of smaller units. The whole spectrum of the Canadian economy is covered.

SIC-C is an important resource for all institutions and companies with large "company-based" records and information systems. It is also the authoritative reference manual for the description of industrial coverage of Statistics Canada's industrial financial statistics.

Catalogue No. 12-570E (Occasional), E. and F., 381 pp., Published 1986
Canada: \$50.00, Other countries: \$72.00.

■ Classification canadienne type des industries pour compagnies et entreprises, 1980

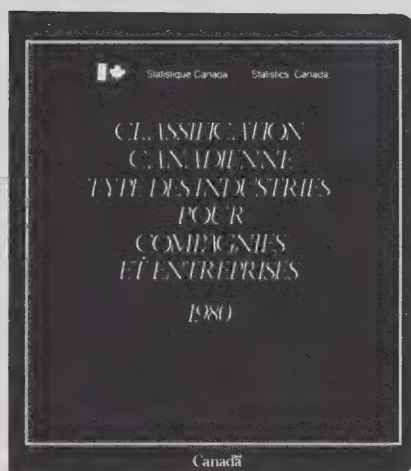

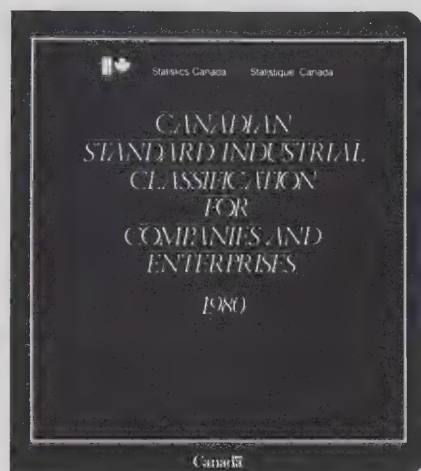

Votre travail financier, d'analyse ou de commercialisation vous amène-t-il à tenir compte d'une multitude de compagnies canadiennes? Si c'est le cas, vous serez heureux d'apprendre que Statistique Canada vient tout juste de mettre au point une structure détaillée qui vous permettra de classer vos registres sur les compagnies et vos statistiques sur le rendement.

Notre nouvelle publication **Classification canadienne type des industries pour compagnies et entreprises, 1980 (CTI-C)** présente une structure hiérarchique pour la classification et le codage des données et des registres sur les compagnies. La publication sera aussi utile à l'économiste pour l'analyse des statistiques financières de Statistique Canada.

Jusqu'à maintenant, la publication **Classification type des industries pour les statistiques d'établissement (CTI-E)** était la seule source qui faisait autorité en ce qui a trait à la classification des statistiques économiques. Bien que celle-ci demeure la meilleure source de classement des statistiques sur l'emploi et la production, la nouvelle **CTI-C** vient la compléter en présentant une méthode pratique de classification des statistiques financières et des registres sur les compagnies. À partir d'une structure regroupant 18 des principales branches d'activité (par exemple, énergie, bois et papier), la **CTI-C** divise chaque branche en une hiérarchie de sous-unités, lesquelles couvrent tous les aspects de l'économie canadienne.

La publication **CTI-C** est un outil essentiel aux établissements et aux compagnies ayant d'importants registres et systèmes d'information sur les compagnies. Elle constitue aussi l'ouvrage de référence qui fait autorité en ce qui concerne la description de la couverture des branches d'activité faite dans les statistiques financières des industries, publiées par Statistique Canada.

■ Urban FSA and Rural Postal Code Summary Data, 1984

Zero in on the perfect market...

In a competitive world, you can't afford to miss reaching your ideal target market or locating the best product testing area. Our most recent small area reference product will make sure you don't.

Urban FSA (Forward Sortation Area) and Rural Postal Code Summary Data, 1984 presents a demographic and socio-economic portrait of the residents of 1,000 urban and 6,000 rural postal code areas. The data present 27 different population characteristics, including age, sex, income and employment status. Using the data in this report, you would find that in Bagot, Manitoba, 84% of taxfilers were married and that their average income was \$8,500. Or that the average worker in West Vancouver's British Properties earned \$17,900 compared with \$9,100 for the average worker in Vancouver's Chinatown.

This invaluable reference book for Canadian marketers and mail order specialists is available in five editions: one for all of Canada, and one for each of Canada's four major regions.

Catalogue No. 17-602 (Occasional), Bilingual, Published 1986.

■ Tableaux sommaires pour RTA urbaines et codes postaux ruraux, 1984

Viser le marché idéal...

Dans un monde où la concurrence est vive, vous ne pouvez vous permettre de rater votre marché cible idéal ou votre meilleur marché-test. Notre outil de référence le plus récent sur les petites régions est une garantie de réussite.

Tableaux sommaires pour RTA urbaines et codes postaux ruraux, 1984 brosse un portrait démographique et socio-économique des résidents de 1,000 régions urbaines et de 6,000 régions rurales de codes postaux (RTA, régions de tri d'acheminement). Les données portent sur 27 caractéristiques de la population, dont l'âge, le sexe, le revenu et l'activité. À partir des données du rapport, vous découvrirez qu'à Bagot, au Manitoba, 84% des déclarants fiscaux étaient mariés au moment de l'étude et que leur revenu annuel moyen était de \$8,500. Ou encore, vous apprendrez que le travailleur moyen de "British Properties" à Vancouver-Ouest gagne \$17,900 annuellement, alors que le travailleur moyen du quartier chinois de Vancouver ne gagne que \$9,100.

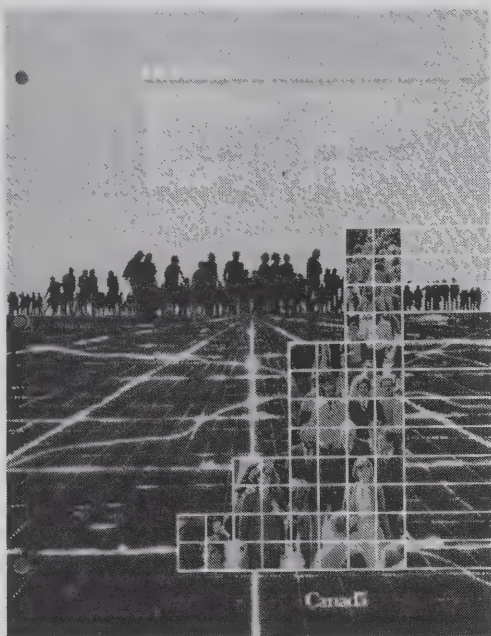

Cet ouvrage de référence d'une valeur inestimable pour les spécialistes de la commercialisation est disponible en cinq éditions: une pour le Canada et une pour chacune des quatre grandes régions du pays.

Population Projections for Canada, Provinces and Territories, 1984-2006

This report describes recent, wide-ranging demographic developments, and the issues which they pose to present and future generations. What are the long-term implications of declines in the size of our population; of pronounced increases in the number and proportion of elderly Canadians? The report also projects the size of future consumer markets and annual population changes: births, deaths and net migration.

An invaluable publication for business planners, policy makers, the media, social scientists and members of the public interested in the future of Canada's population.

Population Projections for Canada, Provinces and Territories, 1984-2006, Catalogue No. 91-520 (Occasional), is available for \$40.00 in Canada (\$50.00 other countries) from Publication Sales, Statistics Canada, Ottawa, Ontario K1A 0T6.

Projections démographiques pour le Canada, les provinces et les territoires, 1984-2006

Ce rapport présente les nouvelles réalités démographiques du Canada ainsi que les problèmes actuels et à venir qui y sont liés. Quels effets auront le déclin éventuel de la population et l'augmentation marquée du nombre de personnes âgées? Le rapport présente également des projections et des analyses touchant la taille des marchés futurs, ainsi que des projections sur les variations annuelles de la population: naissances, décès et migration nette.

Ce document constitue un outil précieux pour les planificateurs, les décideurs, les représentants des médias, les spécialistes en sciences sociales et tous ceux intéressés par l'évolution des tendances démographiques au Canada.

Projections démographiques pour le Canada, les provinces et les territoires, 1984-2006, n° 91-520 au catalogue (hors série), se vend \$40.00 au Canada (\$50.00 autres pays) et peut être obtenu auprès de Vente des publications, Statistique Canada, Ottawa, Ontario K1A 0T6.

The Most Important Assessment of Canada's Environment Ever Published

Environment Canada and Statistics Canada have combined their efforts to prepare two new publications, which are intended to increase broad public awareness of the state of Canada's environment and to stimulate discussion about its links to the economy and human health.

The **State of the Environment Report for Canada**, published by Environment Canada, provides an assessment of current environmental conditions, trends and changes across the country. **Human Activity and the Environment: A Statistical Compendium**, from Statistics Canada, is the most comprehensive statistical description of the variety and intensity of human ventures that affect Canada's ecosystem.

Together, these two publications provide a unique source of information on Canada's environment. They will serve as valuable reference tools for government and industry, as well as for consultants, environmentalists, students and the general public.

HOW TO ORDER

Copies of the **State of the Environment Report** (Catalogue No. EN 21-54/1986E) are available through authorized bookstore agents or your local book seller at \$25 per copy in Canada (\$30 outside Canada). The report may also be ordered from:

Canadian Government Publishing Centre
Supply and Services Canada
Ottawa, Ontario K1A 0S9

The **State of the Environment Report**, comprising 276 pages that include charts, tables and maps, examines a variety of stresses on the environment (e.g. pollution loadings, land use changes, resource exploitation) and the effects they have on our ecosystems (e.g. changes in productivity, mix of species, incidence of disease). The report focusses on the links between human activity, natural forces and changes in the Canadian environment.

The **State of the Environment Report** approaches the environment from an ecosystem point of view. The country is divided into 15 ecozones based on natural, rather than jurisdictional boundaries. This innovative approach makes it possible to describe trends and conditions across an area as vast and diverse as Canada.

The report looks at:

- Agriculture
- Forests
- Fresh Water and Marine Environments
- Wildlife
- Contaminants
- Canada in a Global Setting
- Canadians' Perceptions of the Environment
- Land Use Changes

Human Activity and the Environment is a 375-page compendium of environmental, social and economic statistics, which have been compiled from a variety of sources including Statistics Canada and Environment Canada, as well as federal and provincial government agencies. As such, it documents everything from population distribution to mining; from industrial emissions to contaminants in fish.

A wide variety of detailed statistics is presented, in **Human Activity and the Environment**, for ecozones and drainage basins. The 17 technical boxes found throughout eight chapters explain the nature and usefulness of selected data series, as well as the findings of special scientific studies. This report is a valuable statistical reference containing 172 tables, 66 charts and 77 maps, many in colour.

For further information about **Human Activity and the Environment**, please contact your local Statistics Canada reference centre, listed in the blue pages of many telephone books.

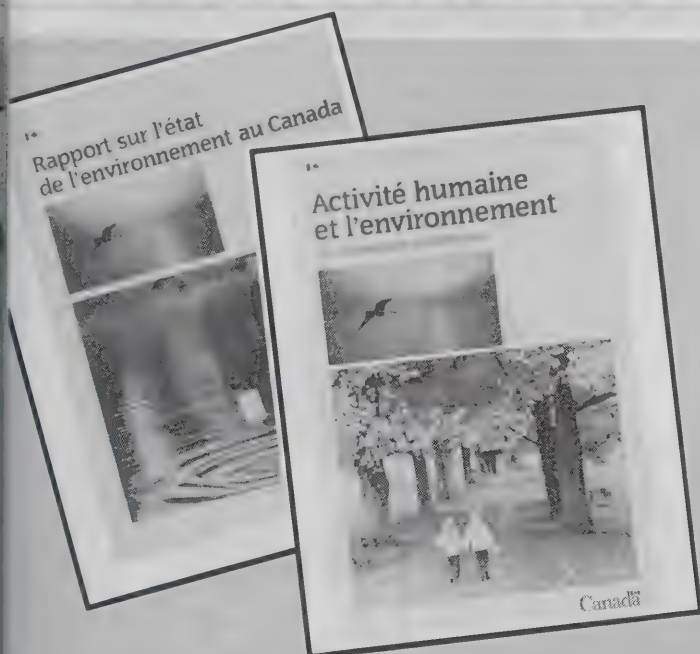

Human Activity and the Environment (Catalogue No. 11-509E) is available at \$45 in Canada (\$55 outside Canada) from:

Publication Sales and Services
Statistics Canada
Ottawa, Ontario K1A 0T6

Please make cheque payable to the Receiver General for Canada — Publications.

L'évaluation la plus importante jamais publiée sur l'environnement au Canada

Environnement Canada et Statistique Canada ont préparé de concert deux nouvelles publications pour sensibiliser les Canadiens à l'état de leur environnement et stimuler la discussion sur les liens entre l'environnement, l'économie et la santé.

Le **Rapport sur l'état de l'environnement au Canada**, publié par Environnement Canada, évalue les conditions environnementales actuelles, les tendances et les changements observés à la grandeur du pays. L'**Activité humaine et l'environnement: un compendium de statistiques**, de Statistique Canada, renferme les données statistiques les plus complètes sur l'impact des diverses activités humaines sur notre écosystème.

Ces deux publications sont une source d'information unique sur l'environnement au Canada. Elles seront utiles à ceux qui travaillent pour le gouvernement et l'industrie, aussi bien qu'aux consultants, aux écologistes, aux étudiants et au grand public.

Le **Rapport sur l'état de l'environnement**, qui comprend 276 pages, illustrées de graphiques, de tableaux et de cartes, examine une série de stress environnementaux (comme l'accumulation de polluants, les changements d'utilisation des terres, l'exploitation des ressources) et leurs effets sur l'écosystème (comme les changements dans la productivité, la répartition des espèces et l'incidence des maladies). On met l'accent sur les liens entre l'activité humaine, les forces naturelles et les changements observés dans l'environnement.

Le **Rapport sur l'état de l'environnement** présente l'environnement dans une perspective écosystémique. Le pays est divisé en 15 zones écologiques définies par des frontières naturelles plutôt que juridiques. Cette nouvelle grille rend possible la description des tendances et des conditions environnementales à travers un territoire aussi vaste et diversifié que le Canada.

Le rapport aborde les sujets suivants :

- L'agriculture
- Les forêts
- La faune
- Les perceptions environnementales des Canadiens
- Les contaminants
- Le milieu aquatique et marin
- Le Canada dans une perspective d'ensemble
- Les changements dans l'utilisation des terres

L'**Activité humaine et l'environnement** renferme 375 pages de statistiques sur l'environnement, la société et l'économie, recueillies de diverses sources dont Statistique Canada, Environnement Canada et des agences des gouvernements fédéral et provinciaux. C'est pourquoi on y retrouve des données sur une foule de sujets, que ce soit la répartition démographique, les mines, les émissions industrielles ou les contaminants dans le poisson.

L'**Activité humaine et l'environnement** contient aussi des données exhaustives sur les zones écologiques et les bassins hydrographiques. Dix-sept cases techniques réparties sur huit chapitres expliquent l'objet et l'utilité des séries de données retenues ainsi que les résultats de certaines études scientifiques. C'est un outil de référence par excellence qui comporte 172 tableaux, 66 graphiques et 77 cartes dont plusieurs en couleur.

Pour de plus amples renseignements au sujet de l'**Activité humaine et l'environnement**, veuillez communiquer avec le centre de référence de Statistique Canada le plus près, qui apparaît dans les pages bleues de plusieurs annuaires téléphoniques.

COMMANDES

Vous pouvez vous procurer des exemplaires du **Rapport sur l'état de l'environnement au Canada** (n° de catalogue EN 21-54/1986F) auprès des agents libraires agréés ou de votre librairie pour la somme de 25 \$ l'unité (30 \$ à l'extérieur du Canada). Le rapport peut aussi être commandé du :

Centre d'édition du gouvernement du Canada
Approvisionnement et Services Canada
Ottawa (Ontario) K1A 0S9

L'**Activité humaine et l'environnement** (n° de catalogue 11-509F) est disponible pour la somme de 45 \$ l'unité (55 \$ à l'extérieur du Canada) auprès de :

Canada Handbook

A Kaleidoscope of Canada and its People

Travel from Coast-to-coast and Never Leave Your Armchair

Where can you find out how much gold is mined in Canada, see what the Library of Parliament looks like, find out the population of Calgary, and discover how much the government makes and spends? In the **Canada Handbook**, of course!

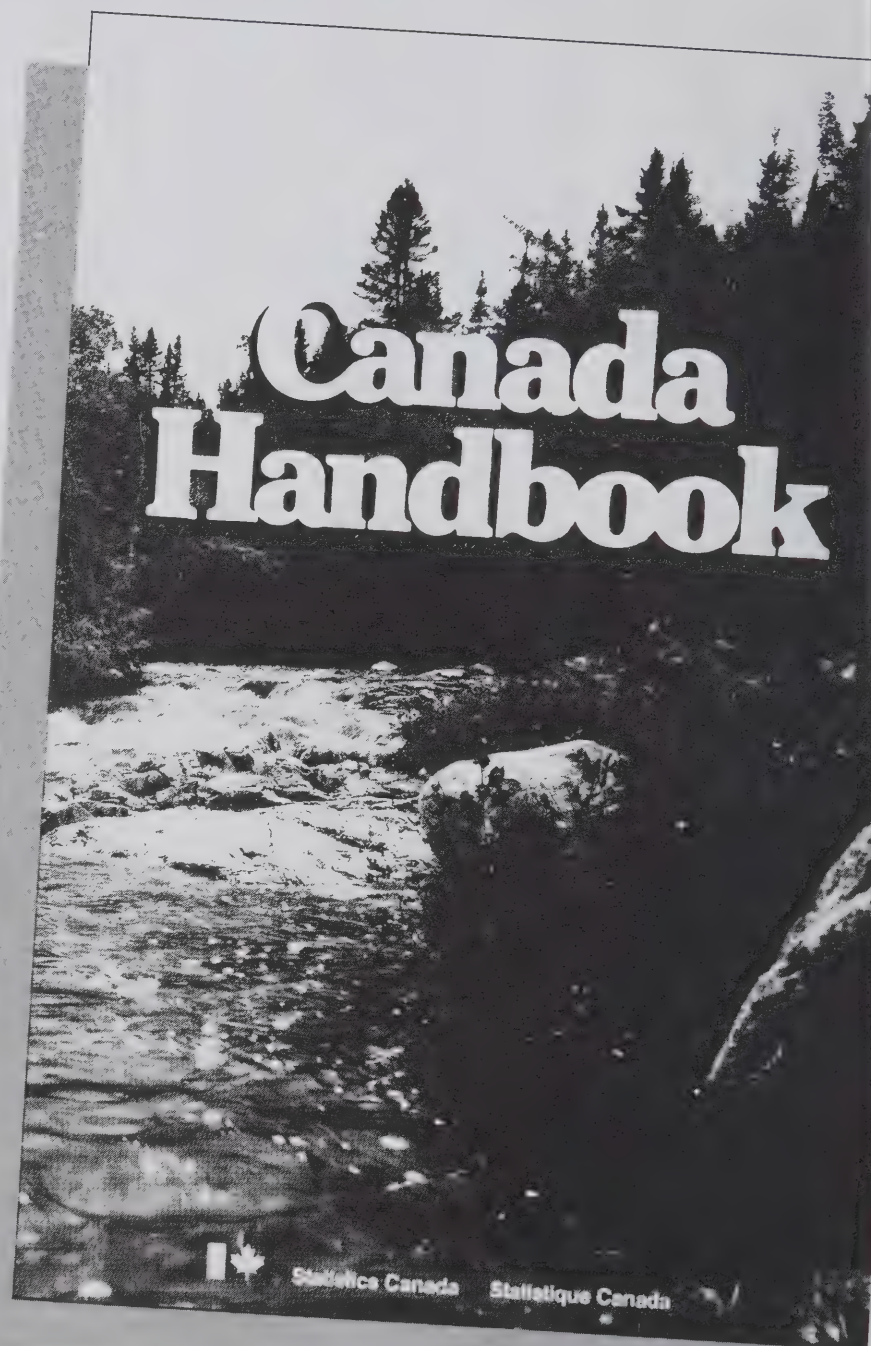

A handsome 6" x 9" volume with 256 pages of text, tables and over 200 striking colour photographs, this virtual mini-encyclopedia contains information on:

- Canada's government and its services
- the economy
- the labour scene
- international trade and investment
- technology
- arts and culture
- geography and climate.

A richly textured portrait of the country comes to life, describing everything from the Athabasca tar sands to a Toronto chocolate factory.

The **Canada Handbook** is a book no Canadian home, office or library should be without. Adults will find it informative and pleasurable reading. Children and teachers will find it an excellent reference book for school projects. And for foreign visitors, it makes an ideal gift.

The **Canada Handbook**, Catalogue No. 11-403E, is available for \$15.00 in Canada (\$16.50 other countries) from Publication Sales, Statistics Canada, Ottawa, Ontario K1A 0T6.
Telephone (613) 993-7276.

Canada

Le Canada

Un reflet des multiples facettes du Canada et de ses habitants

Voyagez d'un océan à l'autre sans quitter votre fauteuil

Où peut-on obtenir de l'information sur la quantité d'or extraite des mines au Canada, voir à quoi ressemble la Bibliothèque du Parlement, trouver la population de Calgary et apprendre combien d'argent reçoit et dépense l'administration publique? Dans le **Le Canada**, bien entendu!

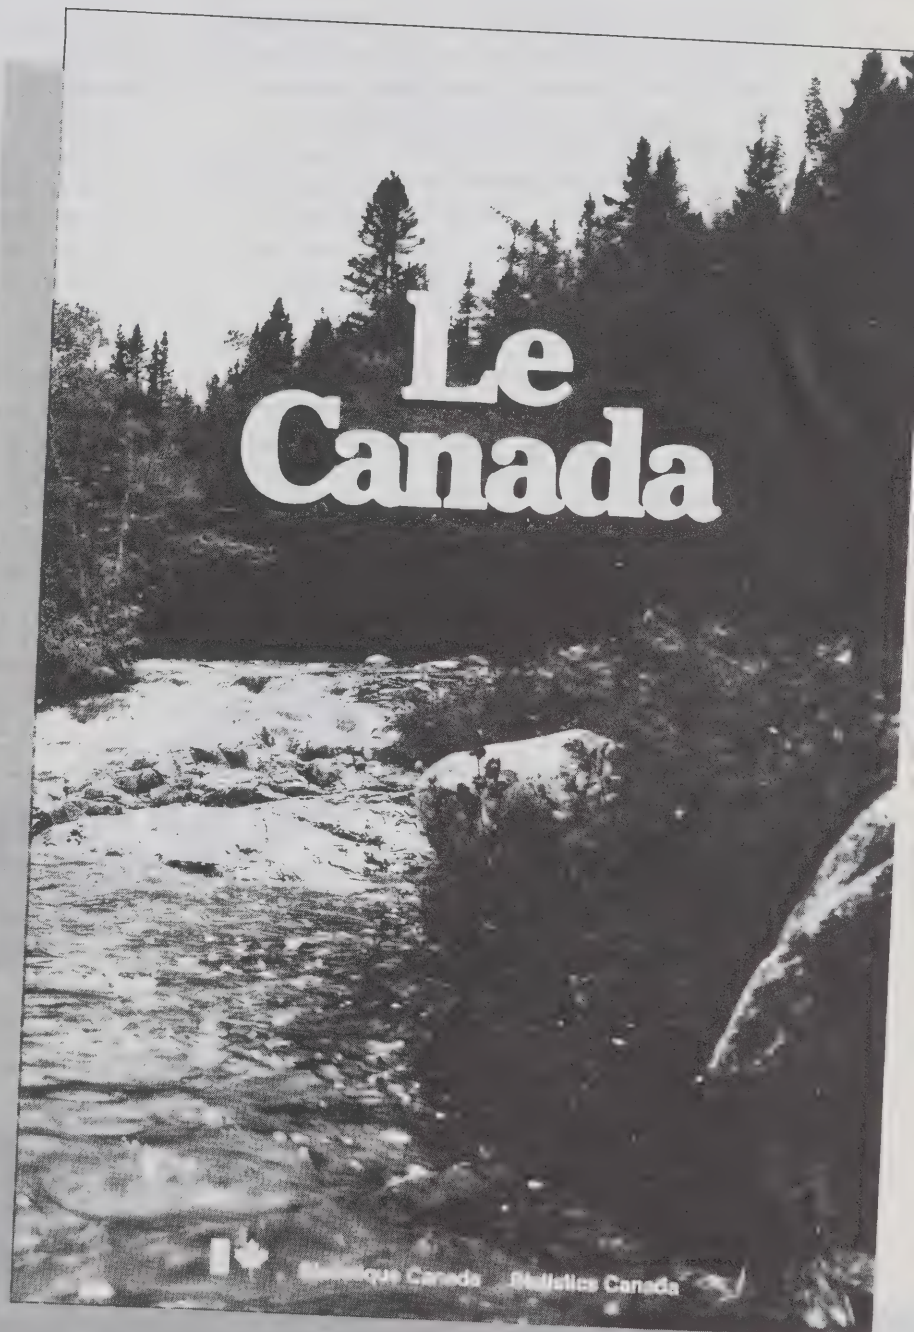

Cette mini-encyclopédie, un ouvrage magnifique de 256 pages renfermant des textes, des tableaux et plus de 200 photos couleurs saisissantes, contient de l'information sur:

- l'administration publique canadienne et les services qu'elle offre
- l'économie
- le marché du travail
- le commerce et les investissements internationaux
- la technologie
- les arts et la culture
- la géographie et le climat.

On y dépeint le Canada dans toute sa richesse, depuis les sables bitumineux de l'Athabasca jusqu'à une chocolaterie de Toronto.

Le Canada est un outil pratiquement indispensable pour tout foyer, bureau ou bibliothèque. Les adultes le trouveront informatif et agréable à lire. Les enfants et les enseignants trouveront qu'il s'agit là d'un excellent ouvrage de référence pour leurs projets scolaires. Et il constitue un cadeau idéal pour les visiteurs étrangers.

Le Canada, n° 11-403F au catalogue, se vend \$15.00 au Canada (\$16.50 autres pays) et peut être obtenu auprès de Vente des publications, Statistique Canada, Ottawa, Ontario K1A 0T6. Téléphone (613) 993-7276.

Canada

Every week

The numbers that make decisions

The data that highlight national economic trends

Infomat is a digest of the most important statistics of the week. It is invaluable for business planners, policy makers and members of the media who take an interest in the Canadian economy.

Articles cite the most recent economic and social data available, describe current trends and point out significant changes. Regular features include a complete list of publications released by Statistics Canada during the reference week, a table of key economic indicators and a list of upcoming data releases. The text is concise, easy-to-read and complemented by tables and charts.

Infomat, Catalogue No. 11-002E (weekly), is available for \$2.00 per copy/\$100.00 annually (in Canada); \$3.00 per copy/\$150.00 annually (elsewhere), from:

Publication Sales and Services,

Toutes les semaines

Les chiffres qui font les décisions

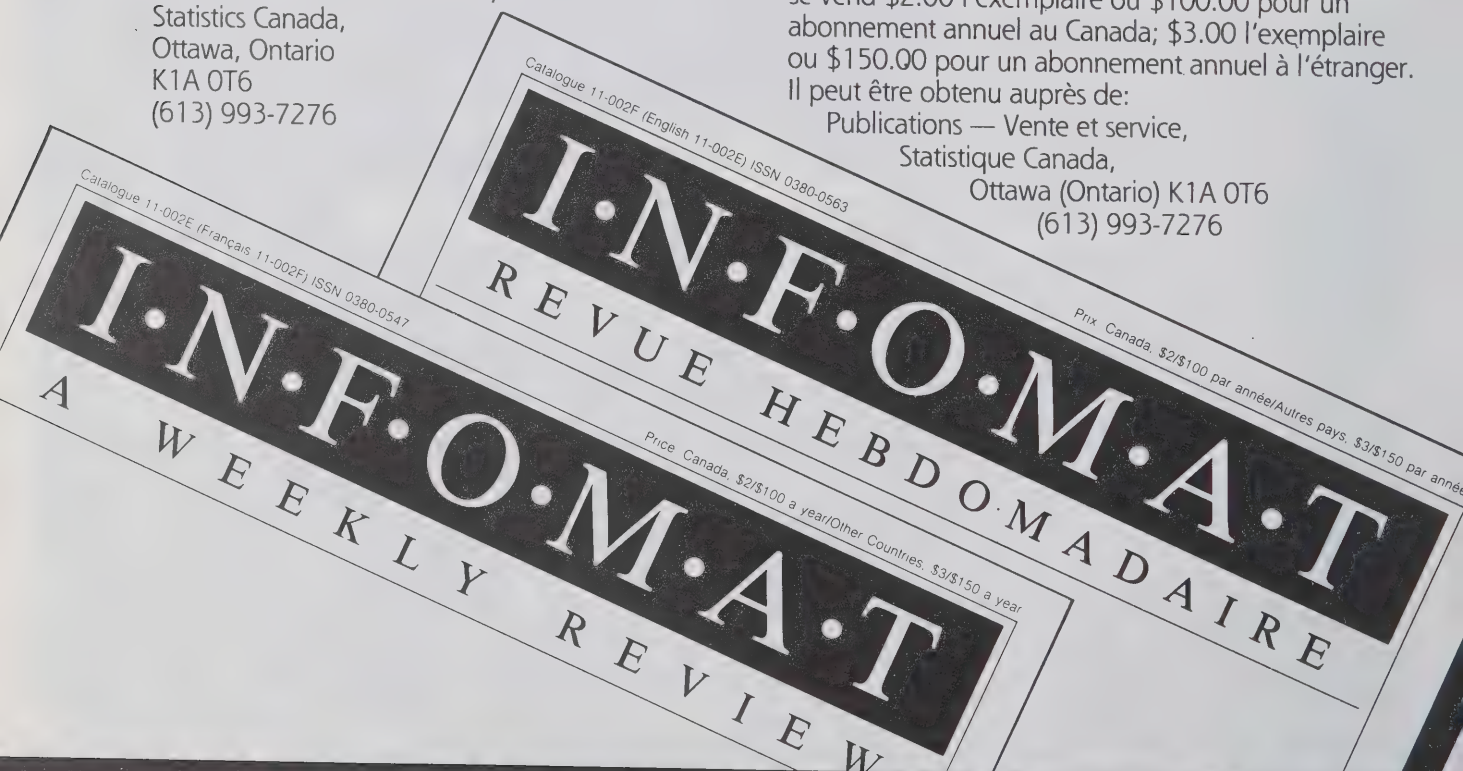

Les données illustrant les tendances de l'économie canadienne

Infomat est un résumé des statistiques les plus importantes de la semaine. C'est un outil d'une valeur inestimable pour les planificateurs du monde des affaires, les responsables de l'élaboration des politiques et les médias d'information s'intéressant à l'économie canadienne.

Les articles contenus dans ce bulletin citent les plus récentes données économiques et sociales disponibles, décrivent les tendances actuelles et soulignent les changements les plus significatifs. On y retrouve des chroniques régulières, notamment une liste complète des nouvelles publications parues à Statistique Canada au cours de la semaine de référence, un tableau des principaux indicateurs économiques, ainsi qu'une liste des données à paraître. Le texte est concis, facile à lire et illustré de tableaux et de graphiques.

Infomat, n° 11-002F au catalogue (hebdomadaire), se vend \$2.00 l'exemplaire ou \$100.00 pour un abonnement annuel au Canada; \$3.00 l'exemplaire ou \$150.00 pour un abonnement annuel à l'étranger. Il peut être obtenu auprès de:

Help-wanted Index

1985

Indice de l'offre d'emploi

1985

■ Help-wanted Index, 1985

If you need to know how the economy is faring, be sure to consult the **Help-wanted Index**, an important indicator of economic change.

The 20 page index shows labour demand from help-wanted ads placed by employers in the classified ad sections of 18 metropolitan newspapers from Newfoundland to British Columbia.

Tables provide figures for the years 1962 to 1985 for a longer term perspective. In addition the publication contains raw and seasonally adjusted line graphs of the last eight years for Canada and five regions: the Atlantic provinces, Quebec, Ontario, the Prairie provinces and British Columbia.

Catalogue No. 71-204 (Annual), Bilingual, 20 pp., Published 1986, Canada: \$10.00, Other countries: \$11.00.

■ Indice de l'offre d'emploi, 1985

Si vous devez savoir comment l'économie se porte, consultez **Indice de l'offre d'emploi**, un indicateur des changements économiques.

Cette publication de 20 pages fait état de la demande d'emploi à partir des offres d'emploi parues dans la section des annonces classées de 18 journaux de régions métropolitaines à travers le Canada.

Les tableaux présentent des chiffres de l'année 1962 à l'année 1985 pour vous donner une perspective à long terme. De plus, la publication contient des graphiques linéaires de données brutes et de données désaisonnalisées, portant sur les huit dernières années, pour le Canada et pour cinq régions: les provinces de l'Atlantique, le Québec, l'Ontario, les provinces des Prairies et la Colombie-Britannique.

N° 71-204 au catalogue (Annuel), Bilingue, 20 pages, Publié en 1986 Canada: \$10.00, Autres pays: \$11.00.
